Extensible functions:

1. LED counter display
2. Cabinet can be lengthened.
3. Two or more pairs of extensible anti-collision infrared sensor, customizable.
4. Voice prompts

Dimensional drawing:

Parameters:

Cabinet Material	304 Stainless Steel
Dimensions	1200*330*980mm
Motor Type	Double motor
Weight	70KG
Arm Length	≤ 300mm
Passage Width	≤ 600mm
Opening Signal	Relay
Material Thickness	1.5mm
Card-reading Window:	Two
Infrared sensor	4Pairs
Protection function	Infrared anti-pinch,Break-in alarm function
Direction	Bi-directional
Service Life	5million times
Operating Temperature	-25℃ ~ +60℃
Related Humidity	≤ 90%RH
Communication Interface	TCP/IP
Power Rate	90W
Power Supply	AC 220V/110V ±10% 50/60MHZ (optional)

Application:

Sliding Gate Turnstiles

- 1.Can be compatible with IC /ID card,bar code card,fingerprint and face recognition access control method.
- 2.Used for staff, provide civilized ,orderly access methods; effectively manage the access of staff .
- 3.Can be widely used in the Bus station,Train station,Airport,Gym,Pleasure ground,other security place for access management.
