### Extensible functions:

1. LED counter display
2. Cabinet and swing arms can be lengthened.
3. Two or more pairs of extensible anti-collision infrared sensor, customizable.
4. Voice prompts

### Dimensional drawing:

## Parameters:

Cabinet Material	304 Stainless Steel
Dimensions	1400*150*1000mm
Motor Type	Double motor
Weight	80KG
Arm Length	≤450mm
Passage Width	≤700mm
Opening Signal	Relay
Material Thickness	1.5mm
Card-reading Window:	Two
Infrared sensor	4Pairs
Protection function	Encoder limit,Clutch anti-collision,Infrared anti-pinch,Break-in alarm function
Direction	Bi-directional
Service Life	5million times
Operating Temperature	-25℃ ~ +60℃
Related Humidity	≤90%RH
Communication Interface	TCP/IP
Power Rate	90W
Power Supply	AC 220V/110V ±10% 50/60MHZ (optional)
Opening Speed:	30-45persons per minute

## Application:

Speed lane gate

- 1.Can be compatible with IC /ID card,bar code card,fingerprint and face recognition access control method.
- 2.Used for staff, provide civilized ,orderly access methods; effectively manage the access of staff .
3. Can be widely used in High class public place,Hotel,Office building,Mansion for access management.
