

How to connect 23mm/29mm camera head to 7mm cable reel

1. Prepare these items

2. Connect 23mm camera to the adaptor

3. Use wrench to remove the original spring connector from 7mm cable reel Screw it with anti-clockwise direction

4. Connect 23mm camera with adaptor to 7mm cable reel.

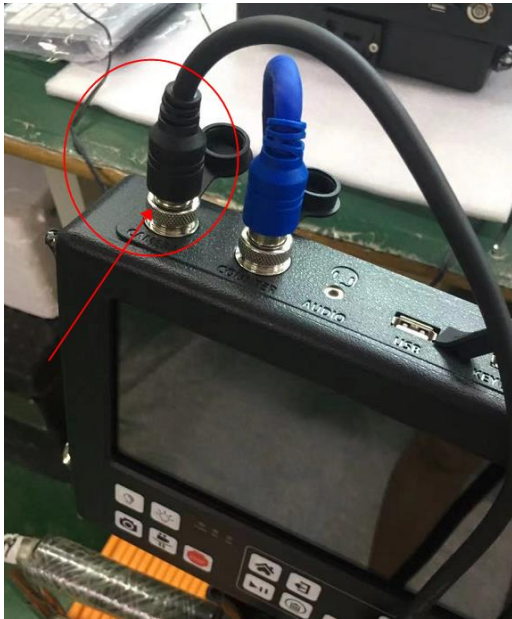

5. Use wrench to screw it tightly. Please must do this .Otherwise the camera will be loosed from the cable reel.

6. Use the special link cable to connect cable reel to control box.

6pin port to control box

5pin port to cable reel.

6pin to control box

5pin to cable reel

When you connect big spring connector to the cable reel, please also use wrench screw it tightly. Otherwise the camera will be lost from cable reel
