Smajayu Document(s) Signer operation instuction

1. Preparation before signing:

- ◆ SMAJAYU signature pad and PDF signer tool only work with PC with WIN 7, WIN 8, WIN 10, WIN 11 OS, 32bit & 64bit.
- ◆ Not compatible with Apple PC currently.
- ◆ There are options for pdf signer, excel signer and word signer.
- ◆ Signature Pad Operation Video:

<https://www.youtube.com/watch?v=UYJwLZ9bKZ0>

Step1: Download Smajayu PDF Signer.msi from

Download Link(we keep latest signer in this link, you can re-download if there is updated):

<https://www.dropbox.com/scl/fo/8gjreb2tn8oj73xqrtlkk/h?rlkey=fj9ku0ng7zqnhrmcq5wfyga6j&dl=0>

Smajayu - v1.2.9 20220611.zip

First unzip the zip file, then double click Smajayu_v1.2xxx.msi to install the Smajayu signer.

Click "Next" -> "Next" -> "Install" -> "Finish" to installation.

Step 2: Connect the Signature pad to your PC by USB port. After Display flash, firmware version, finally pad will go to sleep mode till draw on signer.

Tips: If the pad is stuck at startup, please re-plug USB or change a USB port to restart the pad.
The device may restart 1~4 times, please wait for the restart to complete before signing.

Plug PAD USB to PC

when draw signing
area on Signer**

Step 3: ① Run Smajayu documents Signer then select pdf signer as a new user to generate certificate on PC (important for new user, refer to PDF SIGNER: Toolbar button introduction: ② "Generate Certificate")

Step 4: Open the PDF file that you want to sign.

PDF SIGNER Toolbar button introduction:

① "Allignment"

If the signature is out of order or cannot be written when signing on the signature pad, Allignment is required. For details, please refer to **"3. Allignment"**. (Suggest new user to do Allignment for the pad, it is important solution to solve problem when writing on pad)

② "Generate Certificate"

Please click "generate certificate" button. Then enter the certificate information, click "save" to generate your certificate if it is **first time install** Smajayu Documents Signer on the PC. Which means you can create your own certificate for your signature with encryption. Please note the validity period of the certificate. After this time the certificate will not be available, please re-generate a new certificate.

Select area

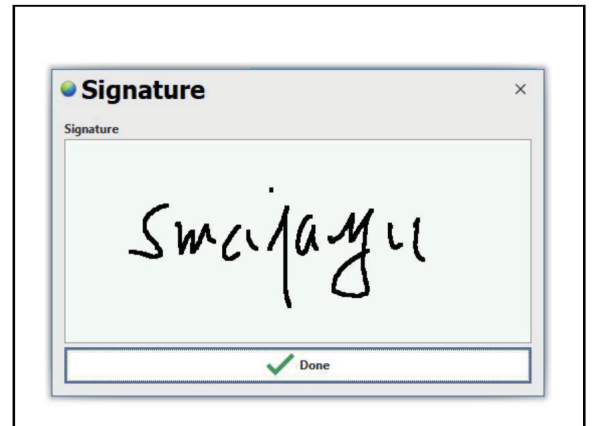

Wake up pad

Click "OK"

Signature applied to pdf

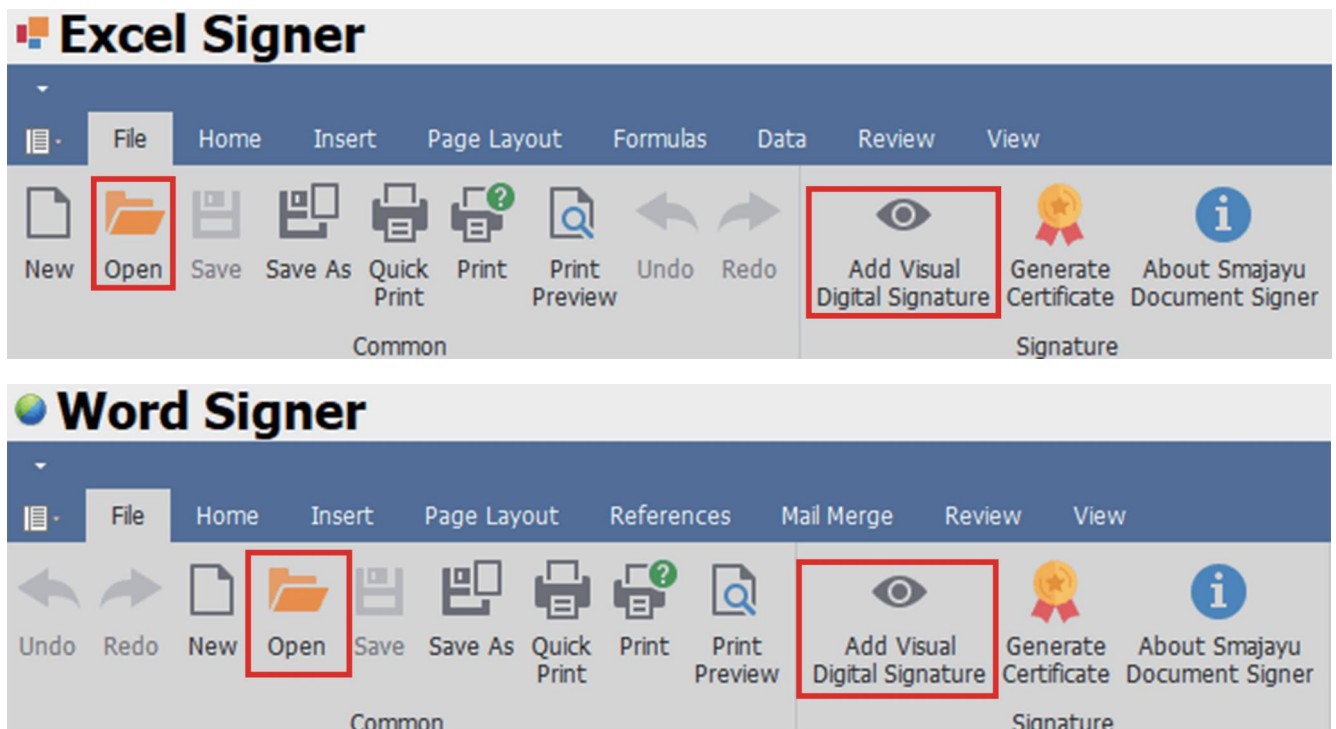

Click "done" on PC

Save file

If you want to sign word file or excel file, run the word signer or excel signer. And open the documents you want to sign then click add "Visual digital signature", it will transfer to pdf signer to sign and save as pdf file.

- Tips:
- ① The signature pad should be connected with PC Before startto draw signing area.
 - ② Try notto disconnectthe USB during the signing process, otherwise Signer will be stuck. If stuck, stop the application restartto run signer.
 - ③ If the sign pen out of control during writing on pad, or when writing on pad is not in order, please kindly Calibrate the pad following in **"3.Alignment"**

3. Alignment

Step1: PAD is connected with PC.

Step2:Run pdf signer

Step 3: Click "Alignment". The signature pad will enter the Allignment interface, then start tapping the cursor  on screen in order(left-top->right-top->right-down->left-down->center) to calibrate.

After calibration, the signature pad automatically restarts.

click "Alignment"

restart

click the dots on the pad

Note: Need to click the four corners and the center of the screen in order, all five points must be clicked. If you miss one point, the signature handwriting will still be messy after alignment, then try re-Alignment.

Firmware update

If the signature pad does not boot properly, you can try to update the firmware .

See the link for details:

<https://drive.google.com/drive/folders/1qj5lett5n0YxZ3jWzfICK5AW5N-AEfHm?usp=sharing>

You can refer to the documentation or video in the link to update the firmware.

product description

FP430S is widely used in banks, post office, retails, securities, insurance & communications, such as signing on a receipt or a contract with a personalized digital signature.

Hardware integration of 4.3 inch LCD display and digitizer with battery-free pen. Signature data capturing including pressure sensitivity, handwriting track and speed. Built in security chip, can be used for high-security application. Provide SDK for secondary development.
