

Fiber Protection Box 2 in 2 out

Product Drawing

Product Description

The square fiber optic protection box is a special protection tube for FTTH fiber to household and other leather line fiber fusion protection. It is suitable for the fusion protection of leather line heat shrink tubes with a length of less than 6CM. It is special for leather line fusion machines and can protect the leather line to leather line and the leather line to fiber tail fiber fusion heat shrink tube parts. The protection of the fiber optic fusion joint is tight and sturdy, suitable for the fusion of various leather wires and fiber optic tail fibers, providing protection for the heat shrink tubing and tail fibers after fusion.

Product features

- Made of high-quality plastic. Strong, neat butt joints.
- Made of new materials, it is high corrosion resistance, strong aging resistance and tensile strength.
- White and smooth, long service life, not easy to deform, not easy to yellow.

Application

Intermediate connection of optical cable lines.

Protection of fiber optic cable branch points.

Fiber optic cable protection in outdoor and harsh environments.

The application of FTTH system.

Fiber optic protection for data centers and communication rooms.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	Fiber Protection Box 2 in 2 out
Material	PP
Model	2 in 2 out
Applicable length	45-60mm
Size	94*47*10mm
Capacity of Splice	2 Core
Color	White
