

Network Faceplate / Rosette Box

Product Drawing

Product Description

The Network Faceplate/Rosette Box adopts a simple and fashionable exterior design, ensuring durability and providing a variety of color options to meet different needs; Support multiple network connection methods, including wired and wireless network access, to meet diverse network needs; The panel box adopts a modular design, which is easy and fast to install. Support multiple installation methods to meet the installation needs of different scenarios.

Product features

- Has excellent compression resistance, impact resistance, and high temperature resistance.
- The interior of the panel box adopts a modular design, which can flexibly configure network interface modules, telephone interface modules, etc. according to needs; The connection between modules adopts standardized interfaces, making installation and replacement of modules simple and fast.
- Adopting low-power design, effectively reducing energy consumption and operating costs; The panel box has a moderate size and can be easily installed on walls, tabletops, and other locations without taking up too much space.
- Compatible with multiple network devices and applications, ensuring the stability and reliability of the network panel box in different scenarios.

Application

The telecommunication network, metropolitan area network, optical fiber communication system.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	Network Faceplate / Rosette Box
Material	ABS
Color	White
Port	1/2/4/6 Port
Size	86*86mm
