

## 64 port Fiber Distribution Box

### Product Drawing

### Product Description

64 port Fiber Distribution Box, also called Splitter Distribution Box or Fiber Terminal Box, can be used in FTTH projects and is suitable for corridor, basement, room, and building's outer walls application. With the function of the mechanical splice, fusion splice, light splitting, and wiring distributions. The fiber access terminal box is with Anti-UV, Ultra violet resistant, rainfall resistant, IP65 waterproof design, and can be installed outside.

### Product features

- Support termination, splicing, splitting, distribution and storage for fiber optic cable systems
- ABS or PC material used ensures the body strong and light.
- Wet-proof, water-proof, dust-proof, anti-aging design for outdoor uses.
- Compact structure and perfect fiber management
- Engineered fiber routing protect bend radius through the unit to ensure signal integrity
- Applicable for pole-mount or wall-mount and compatible with flush-mount outlet.

### Application

FTTH, CATV.

Local area networks.

Data communication networks.

Wall mounted for indoor and outdoor application,

### Technical Specifications

#### Product Parameters

Project	Technical indicators
Product name	64 Port Fiber Distribution Box
Dimensions (length * width * height)	350mm*340mm*120mm
Weight	1 -2 kg
Adapter capacity	64 pieces
Protection Level	IP65
Applicable types	Tail fiber, micro splitter, plug-in splitter
Available Cable	Outdoor or Indoor Cable
Installation way	Wall Mounted or Pole Mountable
