INM Series LED High Mast Light

Power: 230W - 720W

Innovative & Tailored Lighting Solutions for **Success** www.aokledlight.com

Features of **INM** Series

For others & details please request

INM features a smart lighting system with an easy-to-install lid-latch driver box. Its rugged, weather-tight design, corrosion-resistant polyester powder coating, and up to 5G vibration ratings (for certain models) ensure durability. The PMMA material uses a matrix full light-cutting design with a concave light retaining wall to remove excess light and enhance light control, meeting users' range requirements. The lamp's streamlined body features fin-type heat dissipation, edge sinking design, and convection vents for optimized air flow and extended fixture life. It has an IP66 protection grade, waterproof structure, IK10 shake-proof rating, and high-resistance silicone waterproof ring for double protection. The super bracket design supports over 10 times the lamp's weight, offering a higher safety factor. Induction mounting holes are included for future functional upgrades.

Benefits for choosing INM

Tool-Less Maintenance

The driver box requires no tools for maintenance and is easily manageable. Hand clamp-proof .

Professional Optic Design

Various lenses for professional street lamp glare control and light distribution.

Exceptional Impact Resistance

Passed 5G Shock Resistance Test.

Environmental Concept

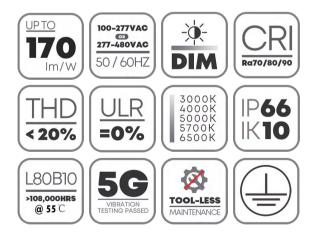

CCT (2700K~3000K) optional,educing ecological impact, and friendly to insects and animals.

Easy Installation

Quick internal wiring connection.

Multiple Accessories and Options

Supports accessories and options such as Photocell (Nema), 3pin/7pin bases, ZigBee, LoRa, Zhaga bases, Dali, Casambi, NB-IoT control.

Ingenious Design For the sake of adaptability

Driver box heat dissipation, protect the power supply and prolong the lifespan.

Fin-shape heat dissipation, fair-shaped design, efficient thermal management to protect the lifespan of the fixture.

High performance modular LED light engine

Easy wiring & installation

3 or 7-pin receptacle with a variety of controls options

Bolt mounting 3G rating

Photometric **Design**

iNM light engine using reflective technology to optimize application efficiency and minimize glare. The efficient design of the LED modules makes each light engine highly customizable, allowing the light distribution to be aimed toward the application.

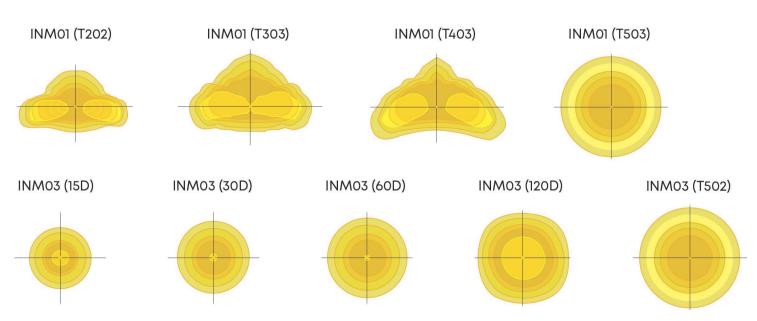

- LM-79 test and report in accordance with IESNA Standard.
- iNM01: 3000K~6500K CCT; iNM03: 2700K~6500K CCT.
- Minimum CRI of 70, 80 and 90 optional.

We deliver innovation and customization, further expanding the flexibility of the project. Exceptional uniformity and low glare for maximum comfort.

• The photometric engine takes advantage of the latest generation of powerful LEDs and dedicated optics for professional applications.

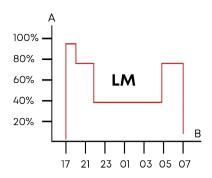

• Combined with Lumileds/Seoul LEDs that provide an alternative solution for those who are looking for very cost-effective yet efficient lighting while keeping the same luminaire design.

Distribution

Custom Dimming Profile

Smart luminaire drivers enable the programming of complex dimming profiles without extra wiring. Customized time intervals and light levels contribute to maximum energy savings, maintaining required lighting levels and uniformity throughout the night.

Daylight Sensor / Photocell

Photocell or daylight sensors switch the luminaire on as soon natural light falls to a certain level. It can be programmed to switch on during a storm, on a cloudy day (in critical areas) or only at nightfall so as to provide safety and comfort in public spaces.

Smart standards. Smarter lighting.

LoRaWAN[®] Luminaire Controller Zhaga is a wireless device for remote LED luminaire control with a Zhaga-compliant connector and DALI interface. It's compatible with LoRaWAN[®], NB-IoT, and LTE-M networks, featuring a modern, compact design suitable for various street lighting modules.

LoRaWAN® Luminaire Controller NEMA is designed for LED luminaires with an ANSI C136.41 NEMA receptacle. It controls the luminaire through DALI or 0-10V analog interfaces and provides a secure power connection with three robust twist lock contacts.

Application Reference

- Road & highway lighting
- Urban road & street lighting
- Residential area ligthing
- Parks & perimeter lighting
- Parking lot lighting

* Note-1: For the power supply in the United States and Canada, in case the input voltage fluctuation >240V the High Voltage solution is highly recommended for performance stability. Improper selection will cause damage to the driver or the light.

Mounting & Accessories

- Heavy-duty die-cast aluminum housing, anti-corrosion.
- Lid-latch driver box design & tool-less entry for easy maintenance.
- Side entry and bolt mounting installation, easy & fast.
- \cdot 3G/5G vibration rated (please request for details), conform to standard IEC 68-2-6.

Control Options

Photocell

Shorting cap

3 pin/7 pin receptacle

*As the products are upgraded, the accessories may differ from those described in the pictures. Please consult with our sales team for updated details and order separately.

Innovative & Tailored Lighting Solutions for **Success**

5 Year Limited Warranty, 10 Year Preferred Warranty. Please consult with our sales for detailed agreement.
