

What can we do?

Your Manufacturing Partner for Multi-Material Furniture

Full-Category Production

Metal Furniture:
Steel frames / Wood-metal hybrids /
Ergonomic chairs

Panel Furniture:
Custom storage systems
Modular office units

Hybrid Products:
Panel-metal structures / Plastic-metal components

Injection Molding:
Precision molds & mass production

Full-Category Production

Specialized Solutions:
Education furniture (safety focus)
Lounge chairs / Smart lockers

Advanced Techniques:
Multi-material bonding
Hidden cable management
Surface finishing (powder coating/plating)

Full-Category Production

Specialized Solutions:
Education furniture (safety focus)
Lounge chairs / Smart lockers

Advanced Techniques:
Multi-material bonding
Hidden cable management
Surface finishing (powder coating/plating)

Design-to Production-Support

From Concept to Reality: CAD optimization
3D prototyping (15-20 days)
Tailored Advice: Material selection
Cost efficiency / Functionality integration

End-to-End Control:
Mold design, metal processing
plastic injection, final assembly
Quality Assurance:
BIFMA/RoHS compliance
Precision manufacturing.

Global Reach: Vietnam hub for tariff-free
access to RCEP and EU markets

CRAFTING THE FUTURE OF FURNITURE

39+ years of experience since 1988
One-Stop OEM & ODM furniture manufacturer

EXCLUSIVE DISTRIBUTOR OPPORTUNITY WHOLE-HOME CUSTOMIZATION SOLUTIONS

Seeking: Regional Master Agents (Province/City Level)
Strategic Partnerships with Interior Design Firms

CƠ HỘI ĐẠI LÝ ĐỘC QUYỀN - GIẢI PHÁP NỘI THẤT TRỌN GÓI CAO CẤP

Tìm kiếm đối tác chiến lược: Đại lý phân phối/Khu vực (Tỉnh/Thành Phố)
Tìm kiếm đối tác nhà thầu thiết kế nội thất

TOP PERFORMANCE

About Us

Top Performance Vietnam Co., Ltd, a wholly-owned subsidiary of Tangzhou Enterprises, was established in 2024 with a total investment of USD 10 million in Thai Binh Province, Vietnam. As a vertically integrated OEM manufacturing base focused on the full industrial chain of furniture production, we deliver end-to-end solutions from design to finished products through advanced technological infrastructure and vertically optimized processes.

Core Competencies

Comprehensive Capabilities: Equipped with state-of-the-art facilities including metalworking workshops (automated tube benders, CNC bending machines, laser cutting systems, robotic welding lines), fully automated painting lines, CNC panel processing centers, and injection molding units, enabling efficient production of complex multi-material furniture.

Quality Assurance

Our in-house laboratory ensures compliance with global standards through rigorous testing protocols: BIFMA certification, paint coating parameters (thickness/gloss/hardness), and RoHS environmental safety checks.

Global Agility

Leveraging Vietnam's strategic advantages and mature supply chain ecosystem, we provide agile customization services to worldwide clients, reducing total cost of ownership while enhancing product competitiveness.

Our History

1986

Foundation In Taiwan

Established in New Taipei City, Taiwan
it laid the groundwork for the future company.

2001

Foundation In Taiwan

Founded ZhongshanTangzhou Daily Products Co., Ltd in the Pearl River Delta, we have scaled production capabilities and advanced standardized manufacturing for global markets.

2024

Global Reach In Vietnam

Launched Top Performance Vietnam Co., Ltd in Thai Binh Province with a USD 10 million investment, we established a vertically integrated OEM hub equipped with intelligent automation, serve premium international brands.

2025

Future-Forward Innovation

Commissioned a dedicated panel processing plant in Vietnam, achieving full-material vertical integration to support clients' low-carbon and customized strategies, we have marked a milestone in sustainable high-end manufacturing.

Our Advantages

End-to-End Quality Control

A closed-loop quality management system spans from raw material screening to supplier audits, with stringent checks on sustainability, durability, and regulatory compliance. Our in-house lab validates critical parameters (BIFMA/RoHS/paint coatings), ensuring products meet global standards from the outset.

Smart Manufacturing Ecosystem

Powered by cutting-edge technology and top-tier talent: Integrated automated production lines (e.g., robotic welding, CNC bending) and a skilled engineering team drive innovation across R&D, production, and quality assurance, embodying our core belief that "advanced tools + exceptional minds = premium products."

Vertically Integrated Production

Full control over key components — from mold design, injection molding, metal tube processing, sheet metal fabrication, painting, to panel furniture assembly — eliminates supply chain fragmentation. Multi-stage quality inspections ensure seamless consistency and reliable output.

Agile Order Fulfillment

Leveraging our China and Vietnam production hub, self-owned production chains and in-house assembly capabilities, we optimize lead times and scale capacity dynamically, enabling rapid response to market demands while reducing clients' operational overhead.

Dual-site Intelligent Manufacturing In China And Vietnam Driven By A Dual Global Supply Chain Engine.

Capacity Strategy

China Base: Deepening precision manufacturing.
Vietnam Base: Focusing on intelligent manufacturing to enhance capacity and quality (RCEP tariff-free).

Dynamic Resource Allocation:

Flexibly allocating production based on order demands.
