## **1. Function brief introduction:**

### **1.1 Introduction to cloud printing**

**Cloud printing (Cloud Printing) is a technology that sends a printing task to a remote printer over the Internet. It allows users to send documents, pictures, or other files through a cloud service to a printer connected to a cloud printing network, without the need to physically connect to a printer or within the same LAN. This technology allows users to send printing tasks from anywhere, on any device, with an Internet connection, a is for the future.**

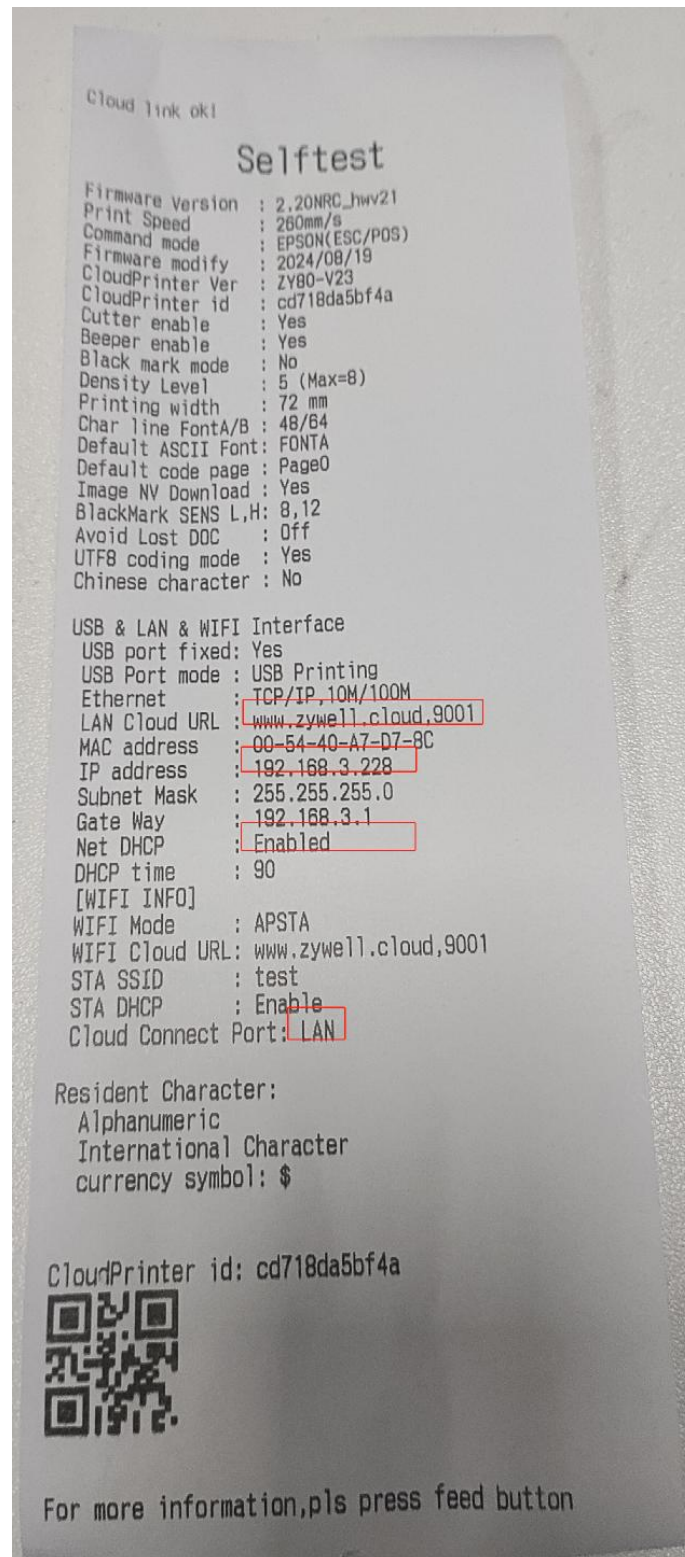

**The advantages of cloud printing include:**

**Convenience:** Users can send printing tasks from any device anytime, anywhere, regardless of geographical location or physical connections.

**Flexibility:** Without being on the same network as a specific printer, you can select multiple printers connected to the cloud printing service.

⑦ Restart the printer to print the self-check page and confirm the parameters of the cloud printer

1. Confirm that the server address to which the LAN Cloud URL is connected is :[www.zywell.cloud,9001](http://www.zywell.cloud,9001)
2. Confirm whether Net DHCP is enabled.
3. Confirm whether the Port connected by Cloud Connect Port is: LAN

## ⑦ Set the WIFI account password for the printer

**Fill in the SSID, WiFi Key and click "Set above contents" to set the WIFI information to the printer.**

**Note: Not supported for 5GHz**

⑦ Restart the printer to print the self-check page and confirm the parameters of the cloud printer

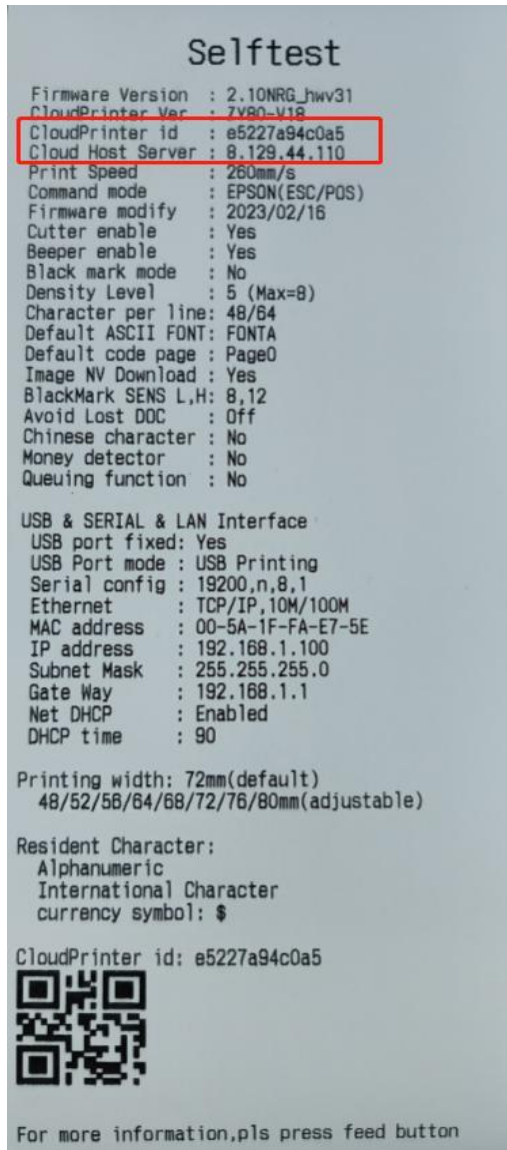

1. Confirm that the server address to which the WIFI Cloud URL is connected is :www.zywell.cloud,9001
2. Confirm whether STA DHCP is enabled.
3. Confirm whether the Port connected by Cloud Connect Port is: WIFI.
4. Confirm whether the SSID is consistent with the set WIFI name.

---

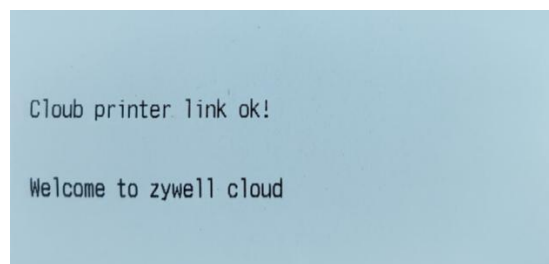

### 3. View the cloud printer ID and the server IP

- ① When the cloud printer is turned off, press the Feed button, and immediately release the Feed button and print the self-check page
- ② Check and keep the self-test pag

### 4. How to judge the success of the cloud printer connection server

- ① The cloud printer is connected to the network cable
- ② Cloud printer prints out a successful connection ticket

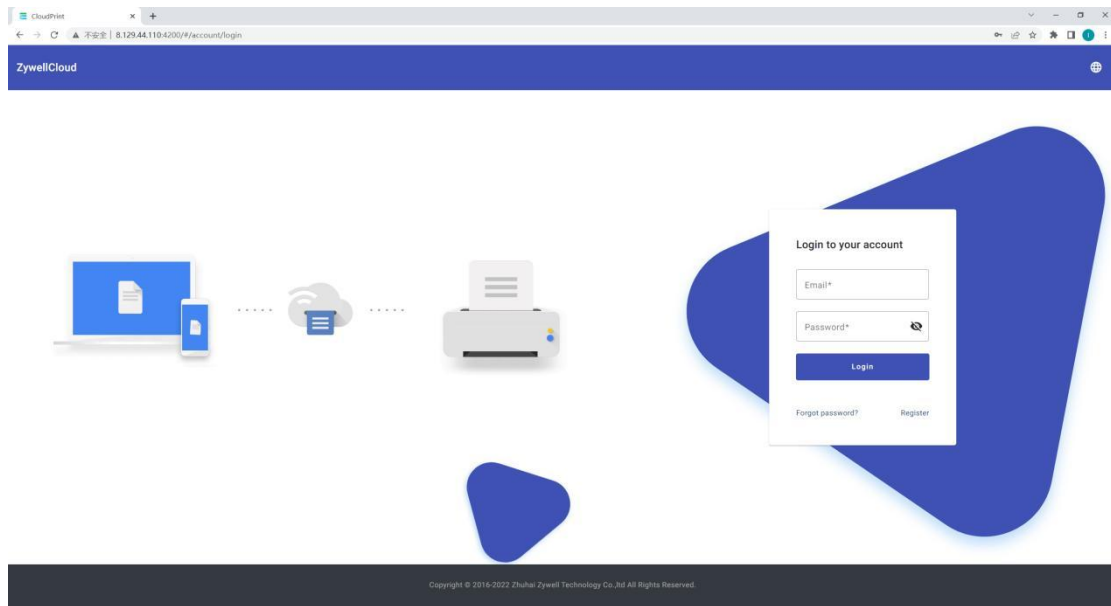

### 3. Operation process:

#### 3.1: Login

1. Open the browser and enter the Web address:

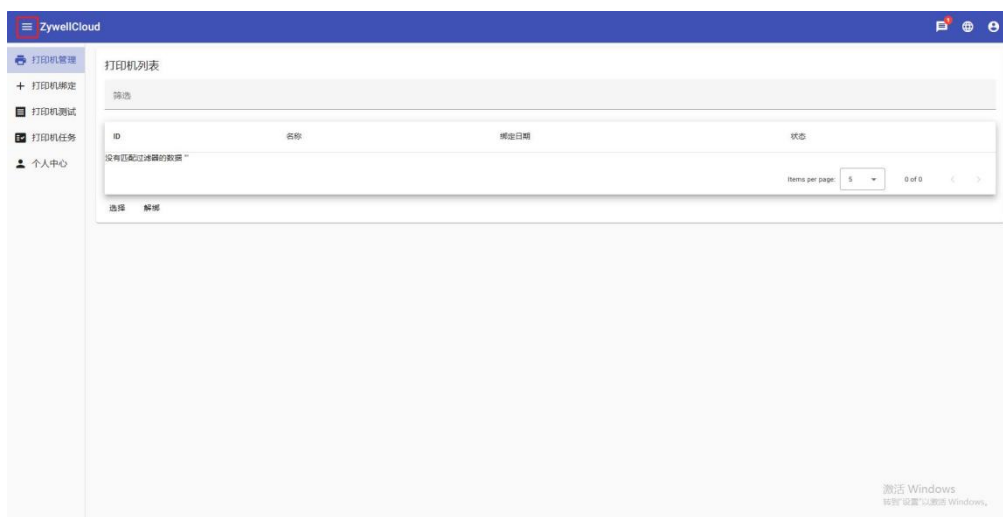

[http:// www . zywell . cloud:4200/#/ account/ login](http://www.zywell.cloud:4200/#/account/login)

2. Enter the account password and click the "Login" button

#### 3.2: Menu bar

[http:// www . zywell . cloud:4200/#/ dashboard/ printerManage/ printerList](http://www.zywell.cloud:4200/#/dashboard/printerManage/printerList)

Click the "Menu" button in the upper left corner to display or hide the menu bar

### 3.3: bind the printer

<http://www.zywell.cloud:4200/#/dashboard/printerManage/printerAdd>

Bind the printer according the printer ID. Support for a single unit and multiple printer binding mode. For multiple bindings, you need to download the excel template, fill in the data, and then upload the file for binding.

#### (1) Single printer binding

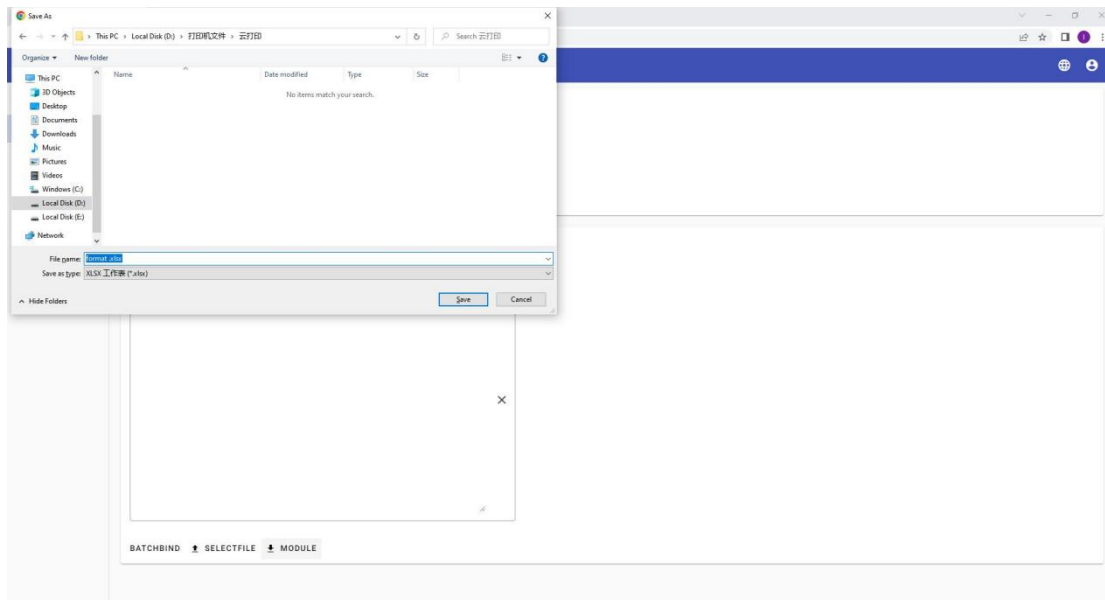

① Under the Single binding column, enter the Cloud Printer ID in the Printer ID box

② Enter the printer name in the Printer Name box

③ Click the "Bind" button, bind the cloud printer, pop up a successful prompt, successful binding

## (2) Batch binding

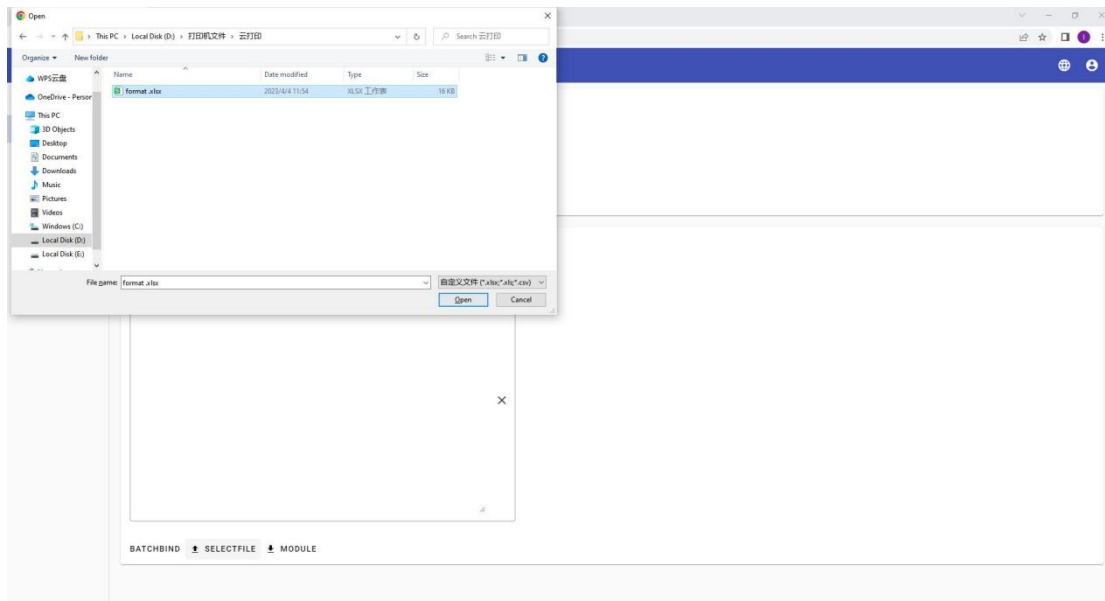

① At the bottom of the "binding List" column, click the "template" button to pop up the file saving window, and click the "Save" button to download the batch import template document

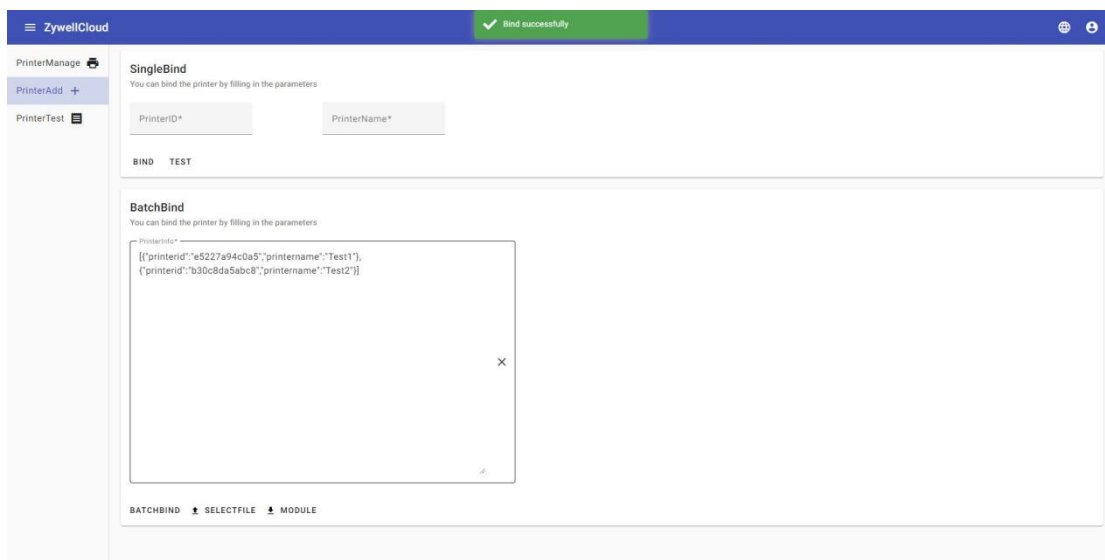

② Open the template file, enter the cloud printer ID and the printer name under the "PrinterID" and "PrinterName" columns, and save the template document after the input completes

③ Click the "Select a File" button to pop up the file selection window, select the template document, and click the "Open" button to import the cloud printer in batches

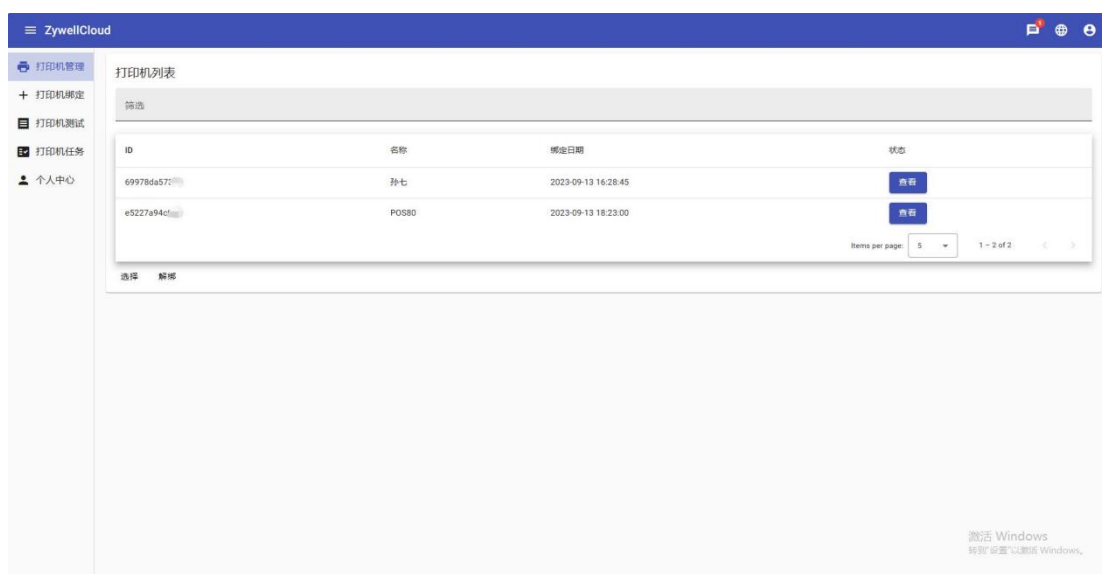

④ Click the "Batch" button, batch bind the cloud printer, pop up success prompt, binding success

### 3.4: Printer management

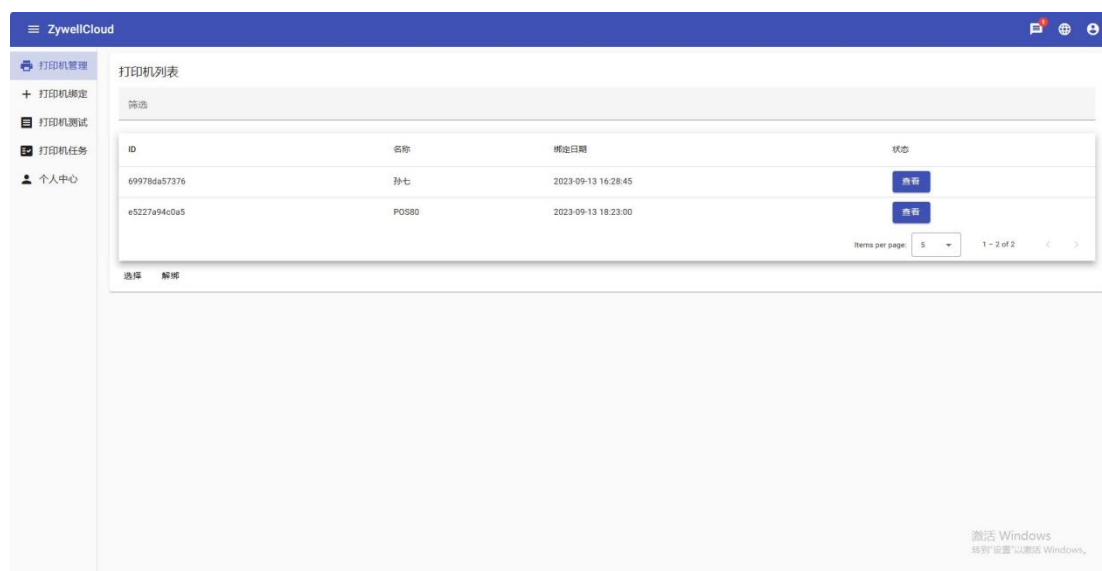

<http://www.zywell.cloud:4200/#/dashboard/printerManage/printerAdd>

Click the "PrinterManage" button to open the printer management interface

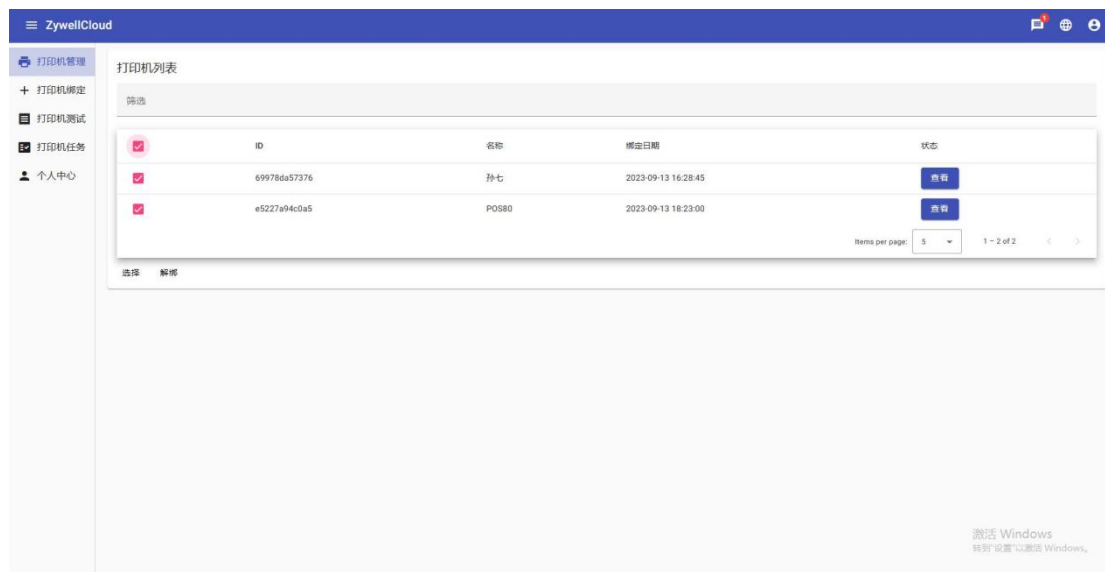

#### (1) Find the cloud printer

Click the Filter box, enter either ID, Name, bind Date, and automatically display the contents of the search

## (2) Multiple selection of cloud printers

Click the "Select" button to check the check box before the "ID"

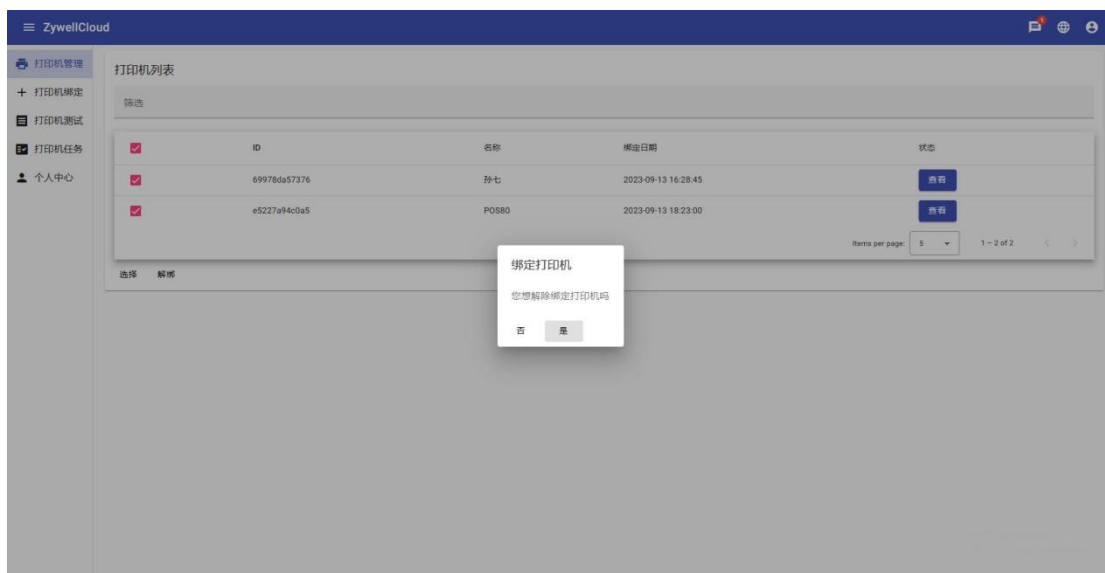

## (3) Unbind the cloud printer and remove a single cloud printer

① Click the "Select" button to check the cloud printer to be removed

② Click the "Unbind" button, pop up the confirmation window, and click the

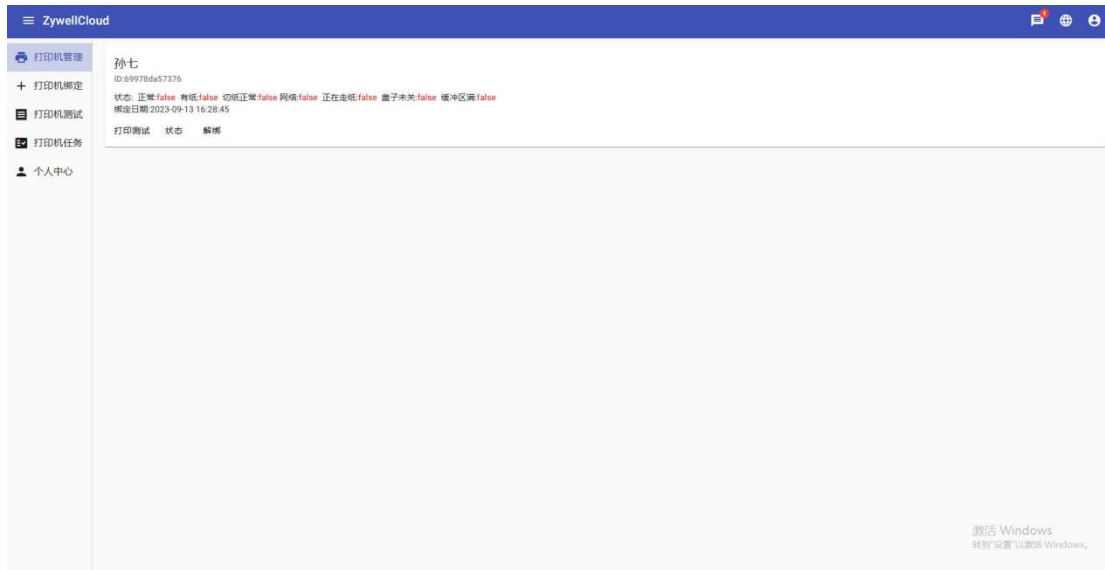

"Yes" button

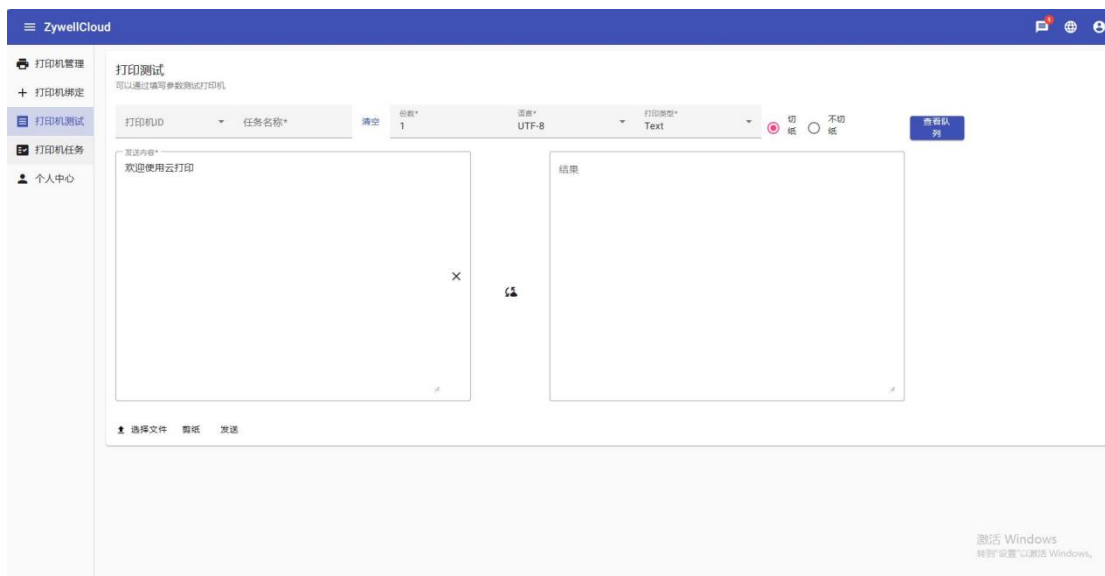

#### (4) State view to view the status of the equipment

##### ① Click the Status-only button to view the current status of the device

### 3.5: Printer test

<http://www.zywell.cloud:4200/#/dashboard/printerManage/printerTest>

Click the "Printer Test" button to open the printer test interface

**Printer id:** Click to enter the cloud printer ID

**Task name:** Click to enter the number of copies: Click to modify the number of copies

**Language:** "UTF-8" printed in English, "GBK" printed in Chinese

**Print type: print text, 16, advanced, picture, bar code, QR code content**

**Select a file: Select a printed file**

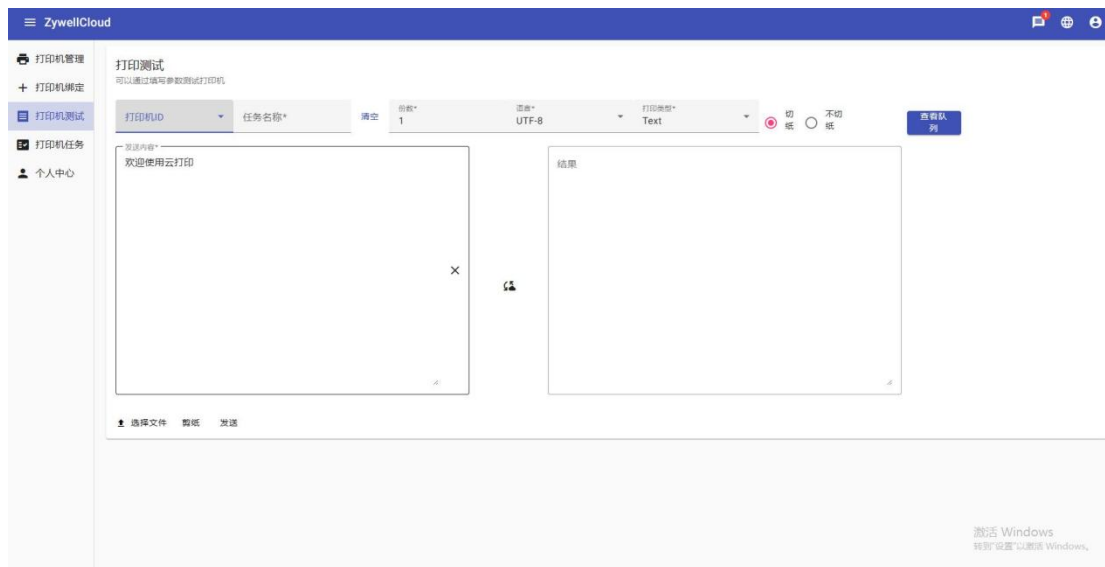

**Cut the paper: the cloud printer will cut the paper**

**Send it: Send the print content to the cloud printer to print**

### **(1) Print the text**

**Text box printing**

**Click the Print Type, select "Text", enter the print content in the "input box" box, and click "Send" to send**

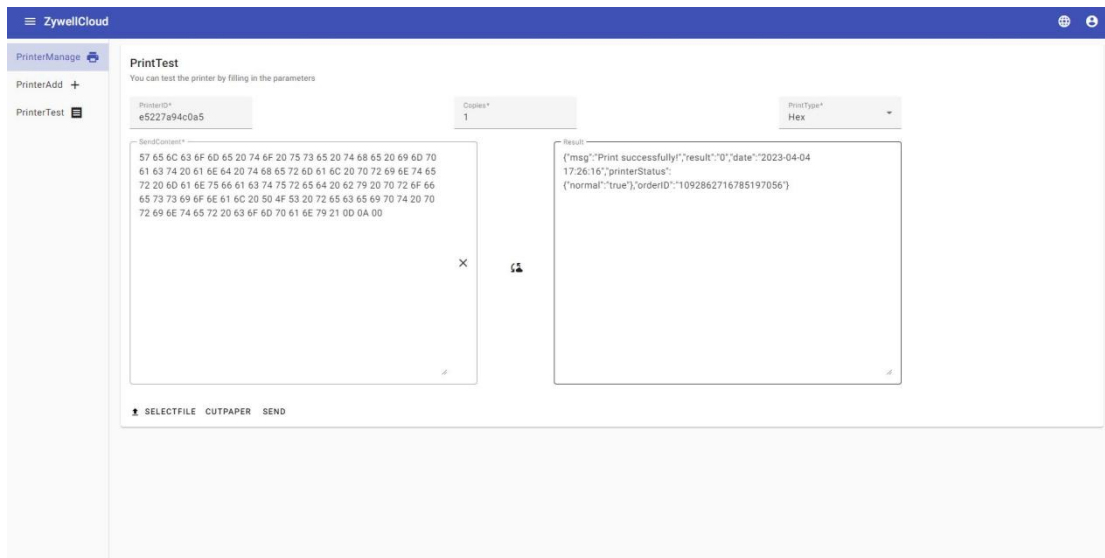

### **(2) Document printing**

**Click the print type, select "File", click "Select File", select txt. png. pdf format file, and click "SEND" to send**

### **(3) Print 16 advanced text box printing**

**Click the print type, select "HEX", enter the print content in the "Send box" box, and click "Send" to send**

### **(1) Print out the pictures**

**Click the print type, select "Image", click "Select File" to select pictures in bmp, jpg, jpeg, png format, and click "SEND" to send**

### **(2) Print the bar codes**

**Click the print type, select "Barcode", enter the barcode content in the "Send Box" box, and click "Send"**

### **(3) Print the QR code**

**Click the print type, select "Qrcode", enter the barcode content in the "Send Box" box, and click "Send"**

### 3.6: Printer task
