KM-UFC3590 Series

K&M TECH: Handheld Ultrasonic Food Cutter

Description

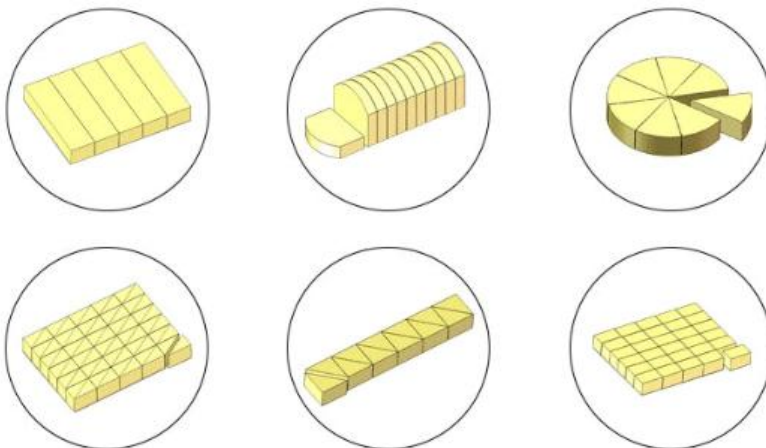

The ultrasonic handheld food cutter is a cutting-edge culinary tool that harnesses the power of ultrasonic technology to redefine precision cutting in the food industry. With its compact design and advanced features, this tool revolutionizes the way food is prepared, offering numerous advantages and versatile applications.

Features

- ✓ Ensure clean, precise cuts through various food textures
- ✓ Ultrasonic cutting prevents crushing or deforming delicate foods;
- ✓ Controlled and safe operation, minimizing the risk of accidents.;
- ✓ Ergonomic design and user-friendly controls of easy to use;
- ✓ Non-contact cutting reduces contamination risks, ensuring food safety;
- ✓ Suitable for bakeries and manufacturers with small output, and limited space.

Cutting Mode

Technical Parameter

Name	Brand
Product Name	Handheld Ultrasonic Food Cutter
Model	KM-UFC3590
Frequency	30kHz
Rated Power	500W
Rated Voltage	220V 50/60Hz
Cutting Knife Size	356mm(length), 275mm(effective cutting), 30mm(Height)
Knife Material	Titanium
Touch Screen	4.3-inch touch screen
Core Components	Generator, transducer, cutting knife
Power Controller	stepping or continuous
Cable Length	3M or customized
Application fields	Frozen food Factory
Warranty	1 Year
Dimension(L*W*H)mm of generator	380mm*290mm*110mm
Weight(kg)	4.5kg(generator),1kg(transducer+knife)
