SANDY .  
Fire kisses nature, simplicity and beauty

# Sandy

Fire kisses nature,  
simplicity and beauty

The kiln fire naturally refines the golden glaze in the morning light,  
and the flowing glaze texture is like the veins of the earth,  
interpreting the true meaning of wabi-sabi aesthetics.

Each fire mark is a unique kiln-changed product,  
and the rough pottery texture conveys the warmth of  
hand-made, injecting the vitality of returning to  
nature into the high-end space.

ICY BLUE .  
Pure Elegance Meets Durable Performance

## Icy Blue

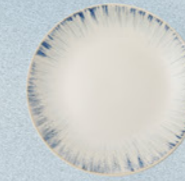

Pure Elegance Meets Durable Performance

The Ice Blue captures the crisp, refreshing essence of pristine winter mornings with its cool and serene blue tones.

The smooth, glossy finish enhances the calming ice blue color, creating a sophisticated yet inviting atmosphere for any table setting. Designed to combine lasting strength with refined aesthetics, the Ice Blue Collection brings a touch of tranquility and professionalism to every dining experience.

Matte Milk Porcelain with  
Wheat-Gilt Accents

Crafted in premium milk-white porcelain, this collection embodies tactile serenity through a signature velvety matte glaze that diffuses light like morning mist over limestone. Each piece features a meticulously hand-applied wheat-gold band.

Fired at 1280°C+, the high-density clay body resists thermal shock, while the stain-hiding matte surface forgives watermarks – ideal for bustling hotel breakfast buffets and specialty coffee service.

Designed for hospitality spaces seeking timeless neutrality, it provides a versatile canvas for vibrant cuisine without visual competition. Where understatement becomes the ultimate statement of refined taste.

 TWO EIGHT®

TRACE .  
Autumn colors melt gold, timeless

TWO EIGHT  
Dine with 28 Ceramics. Dine with the world

## Trace

Autumn colors melt gold, timeless

The glaze is imprinted with the texture of molten gold maple leaves, and the matte texture reveals the warm autumn tone, interpreting the symbiotic aesthetics of nature and industry.

High-temperature porcelain is quenched with rock-level density, resistant to falling and wear, and can withstand thousands of washes in the hotel. The vein texture enhances the non-slip grip, and each crack becomes a unique artistic signature, injecting warm and tenacious vitality into high-end catering.

# Sunset

Gilded twilight,  
time and space gilding

Amber glaze and twilight interweave, condensing the sunrise and sunset on the porcelain surface, interpreting the art of time flow.

The high-temperature porcelain body is forged with high density, and the wear resistance and anti-aging performance are increased by 20%, which is not afraid of thousands of times of washing in the hotel.

The zero-color difference glaze layer refracts the halo of the sunset when encountering light, covering the high-end dining space with eternal twilight aesthetics.

STARDUST .  
Fluid Cosmos in High-Fire Porcelain

# Stardust

Fluid Cosmos in High-Fire Porcelain

Capture the silent symphony of a million stars with Stardust, a porcelain collection that translates cosmic wonder into tactile artistry.

Each piece becomes a celestial canvas, where hand-applied crystalline glazes erupt into constellation-like speckles suspended in depths of midnight blue, nebula violet, or cosmic charcoal.

As light dances across the surface, these metallic accents shimmer like distant supernovae, while fluid "ripple" textures beneath evoke solar winds sweeping through stardust clouds.

# Blaze

Wild beauty, rock toughness

Polished bright surface design, with deep crack texture, combines primitive tension with modern pragmatism, injecting earth art atmosphere into high-end dining space.

Inspired by the natural texture of lava quenching, the series interprets the original aesthetics with rough burning texture. Made of 1280°C high temperature porcelain, it achieves super high density, impact resistance, scratch resistance, and is not afraid of high-intensity use in hotels.

NEW ARRIVAL

RUST.  
Uniquely Forged: The Ironstone Effect

TWO EIGHT  
Dine with 28 Ceramics. Dine with the world

PHOENIX .  
Feathers in porcelain, flexible and symbiotic

# Phoenix

Feathers in porcelain, flexible and symbiotic

Inspired by the phoenix feather marks, the glaze flows with minimalist linear relief, interpreting the oriental blank aesthetics in a modern way.

High-temperature forged dense porcelain bones, the anti-fall and wear resistance are improved by 40%, and there is no fear of high-intensity collisions in hotels. The matte skin-friendly touch rejects fingerprints, and the smooth feather pattern is looming in the light and shadow, giving high-end banquets a light but powerful aesthetic carrier.

WHORL .

Rough aesthetics, both rigid and soft

# Whorl

Rough aesthetics, both rigid and soft

Inspired by the rock formations on the Australian coast, the matte glaze is sprinkled with natural black spots, interpreting the original industrial style.

Create a dense body, anti-aging and fall-resistant, and can withstand high-frequency washing in hotels. The original ribbed structure + micro-arc bottom foot achieves stable foldable stacking, saving 50% of storage space, and providing commercial kitchens with a solution that combines wild texture with efficient and practicality.

# Thomas

The power of simplicity, timeless

The matte glaze layer rejects fingerprints and interprets modern minimalism. The 1280°C high temperature porcelain is quenched to rock-level density, impact-resistant and scratch-resistant, and can withstand thousands of washes in the hotel.

The neat geometric outer ring creates a calm and high-end feeling, and the non-reflective surface avoids the glare interference of tableware, providing a solution for high-end dining spaces that combines quiet aesthetics with zero maintenance costs.

BREEZES  
Liquid Mineral Suspended in High-Gloss Porcelain

# Breezes

Liquid Mineral Suspended in  
High-Gloss Porcelain

Precision-fired at 1280°C, the domed droplet texture enhances grip while resisting utensil scratches – critical for high-turnover hotel banquets. Mirror-like gloss amplifies color depth, creating jewel-toned place settings that withstand 500+ commercial dishwasher cycles.

Beyond durability, the Breezes pioneers Fluid Mineral Design. The tactile "raindrop" relief interacts with light dynamically, casting micro-shadows that evolve with ambient lighting. Curate chromatic narratives by mixing colors: pair Emerald Canopy salad plates with Basalt Fog entrées for forest-to-mist storytelling, or layer Amethyst Geode under Glacial Milk for mineral strata effects.

# Breezes

Liquid Mineral Suspended in  
High-Gloss Porcelain

Precision-fired at 1280°C, the domed droplet texture enhances grip while resisting utensil scratches – critical for high-turnover hotel banquets. Mirror-like gloss amplifies color depth, creating jewel-toned place settings that withstand 500+ commercial dishwasher cycles.

Beyond durability, the Breezes pioneers Fluid Mineral Design. The tactile "raindrop" relief interacts with light dynamically, casting micro-shadows that evolve with ambient lighting. Curate chromatic narratives by mixing colors: pair Emerald Canopy salad plates with Basalt Fog entrées for forest-to-mist storytelling, or layer Amethyst Geode under Glacial Milk for mineral strata effects.
