The glaze is vibrant, hardness and softness are combined

The bright glaze is stacked with vortex ripples, and the light and shadow flow like liquid metal solidification, interpreting the futuristic fluid art.

1280°C forged crystal diamond-level density, the impact resistance is increased by 20%, and it is not afraid of thousands of mechanical washings in the hotel.

The curved non-slip grip groove is hidden in the texture, and the strong core is wrapped in dynamic aesthetics, injecting sci-fi tension into high-end catering.

Bessel

Pure power, timeless

The steel-grade bright glaze layer interprets absolute pure colorism, and the zero-impurity monochrome philosophy creates a visual anchor for the space.

The porcelain forged crystal diamond body has improved scratch resistance and wear resistance. The millimeter-level glaze precision refuses to penetrate dyes, and the calm geometric silhouette builds a timeless aesthetic foundation for high-end catering.

Pebble

Raw stones are nature's gift.
Each one carries its distinct shape, texture, and color.
The Pebble collection shares this natural beauty, and when combined
with dynamic glazes, they inspire ceramics that are truly one of a kind.
