

RK600-07CT Data Logger

Overview

RK600-07CT Data Logger with data acquisition, storage, transmission and management, and other functions, is the core component of automatic weather station, which can connect 32 parameters at the same time, has the settings and color LCD display, can communication with sever or cloud via cable or wireless connection, provide communication protocol, convenient for secondary development.

Features

Local real-time display

Multiple sensor interface

Large storage

Multiple communication interfaces

Wireless optional

Data cloud platform

Self-contained clock chip

Solar power supply optional

Custom display interface

Free app and PC remote monitoring software

Advantage

Real time data display and storage

Adjustable data storage interval

Real time viewing of data tables

Support remote viewing and exporting CSV format data

Support wireless connection between data loggers and cloud servers

Support U-disk local data export

Support exporting data within a specified time period

The connector supports blind insertion, with no risk of incorrect insertion

Compatible with both DC and AC power sourcesLow power design, supporting solar power supply

RIKA provides cloud platform open services for multi device management

Third party software APP、Mini programs and other applications can directly embed HMI screens, instantly possessing remote control capabilities for devices

Support custom display interfaces (including logos, languages, etc.)

Item	Details
Display	7" color touch screen with backlight
Resolving power	1024*600
Touch type	Resistive type
Screen sleep	Support
Backlight adjustable	Support
Communication status indication	Support
Internal storage	4GB+512M
Communication interface	COM1:RS232/COM2:RS485/COM3:RS485/USB
Network	Ethernet (standard), 4G, WIFI ,LoRaWan(optional)
Communication protocol	Modbus-Rtu、Modbus-TCP、HTTP、MQTT
Supply	DC12-24V, AC100-240V(adapter)
Measurement parameters	32 max 10 analog input/22 digital input
Recording interval	1-240min settable
U_disk download	Support
Relay output	Customized
Average consumption	<7W
CPU	Quad core A7 processor 64bit
Power protection	Equipped with surge protection and anti reverse protection
Withstanding voltage	500VAC
Insulation impedance	Exceeding 50M Ω @ 500VDC
Working temperature	-10-+60℃
Storage environment	-20 ~70℃
CE	EN55022 & En55024
Shell	400*500*200mm, Support solar power supply

Icon	Unit	Value
	Wind Speed(m/s)	8888.8
	Wind Direction(°)	88888
	Air Temperature(°C)	-8888.8
	Air Humidity(%)	8888.8
	Air Pressure(hpa)	8888.8
	Rainfall(mm/24h)	8888.8
	UV Radiation(W/m2)	8888.8
	CO2(ppm)	88888

Data Curve Interface

RIKA Cloud

The interface shows a sidebar with navigation icons and a main content area. The main area displays a summary of data for device R25040310, including wind speed (0 m/s), humidity (58.7%), and CO2 (374 ppm). Below this is a table of recent data exports.

UTC TIMES	wind_speed(m/s)	wind_direction(°)	temp(°C)	humid(%)
2025-06-17 16:45:56	0	70	28.3	59.2
2025-06-17 16:44:56	1.8	275	28.4	58
2025-06-17 16:43:56	1.8	275	28.4	58
2025-06-17 16:42:56	0.9	294	28.4	58.4
2025-06-17 16:41:56	3.3	295	28.2	58.2
2025-06-17 16:40:56	2	245	28.3	58.2
2025-06-17 16:39:56	0	14	28.1	58.7
2025-06-17 16:38:56	2.1	267	27.9	59.2

Data Export Interface

Data Statistics and Map Display

The API interface provides documentation for the HTTP protocol. It includes a 'HTTP Protocol Description' section with details about device IDs, sensor IDs, timestamps, and parameter names. An 'Interface example' section shows a 'Get device data' endpoint with a Python example. A 'POSTMAN How to get it' section includes a screenshot of a POSTMAN request.

HTTP Protocol Description

- device_id**: That is, device ID. Each device has a unique device ID value.
- sensor_id**: That is, the sub-device ID. Each device is connected to multiple sub-devices. For example, a set of weather station equipment has multiple rainfall and temperature and humidity sensors, which are distinguished by sensor_id.
- time**: That is, a 10-digit timestamp, which is the UTC time configured by the user. At the same time, the user can change the local time zone in the settings. The default is Dongba District Beijing time (utc+8).
- api_name**: That is, the modified parameter name is returned together so that you can more intuitively identify your device.
- value**: That is, the latest value of the parameter.
- unit**: Parameter unit.

Data Logger

Part List

Item	RK600-07C
Data logger	✓
Protection box	✓
Waterproof connector(to sensors)	✓
Power connection terminal	✓
USB-RS485 converter	✓
Power adapter(AC100-240V@12VDC)	✓
Solar charging controller	Optional
Solar panel	Optional
Lead acid battery①	Optional
Ethernet module	✓
GPRS/2G/3G/4G	Optional
Lora module	Optional
Relay module	Optional
Other parts	Customizable

①Since air transportation is not available, it is recommended that users purchase locally.
