## Feature:

1. The light source directly adopts the light board, and the T8/T5 tube is not needed, and the

luminous efficiency is higher;

2. High-quality shell is durable, protection upgrade, trust guarantee, and flame retardant technology can be used safely;

3. The lamp body and the translucent cover are made of fireproof PC material, which has good flame retardancy; the protection grade is up to P65;

4. The lamp body and the transparent cover can be packaged separately, which effectively reduces the packaging volume and saves freight;

5. Available with transparent cover and opal cover; transparent cover, light transmittance 93%; milky white cover, light transmittance 83%;

6. The lamp body has two types: wide side and narrow side. The wide side light is soft and the glare is small; the narrow side cost is relatively low;

7. PC material has good wear resistance, folding resistance and pressure resistance; it can bend at 180 degrees without crack; the buckle has PC and stainless steel materials;

8. Using high-quality SMD2835 chip, high-quality constant current drive, stable and reliable performance, high luminous efficiency, long life and low maintenance cost;

Installation diagram

Applicable:

Widely used in factories, warehouses, walkways, schools, restaurants, underground parking lots and other places.
