

Stay wire

Product Drawing

Product Description

Stay wire is a high-quality steel wire product that combines high strength, wear resistance, corrosion resistance, and other characteristics, which can meet the needs of various complex environments and conditions.

Product features

- Using high-quality carbon steel or alloy steel as raw materials, the steel wire undergoes strict cold drawing or cold rolling treatment to ensure excellent tensile strength and toughness.
- It has excellent corrosion resistance and can maintain stable performance in harsh environments such as humidity, acid and alkali.
- The steel wire rope has a stable structure and is not prone to sudden breakage, ensuring smooth and reliable operation during use.

Application

Suitable for construction, bridges, power, communication and other fields, providing strong support for various projects.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	Stay wire
Material	SS304 SS316
Diameter	2mm-50mm
Surface treatment	Customers' Requested
Usage	Round Wire Brush
Tensile strength	1570Mpa-1960Mpa
Keyword	Coated wire rope
Surface	Galvanised Zinc
