

# **Vibration Damper**

## **Product Drawing**

### **Product Description**

Vibration Damper is a device designed specifically to reduce vibration. It is made of high-quality materials with excellent durability and stability, which can effectively reduce the vibration generated by various optical cables during operation, ensuring the stable operation of the product and extending its service life.

### **Product features**

- Made of high-strength and aging resistant materials, it has excellent durability and corrosion resistance, and can be used for a long time in various harsh environments.
- Designed with standard installation interfaces and methods, easy and fast installation.

### **Application**

Suitable for various equipment and structures, such as buildings, bridges, power, communication, and other fields.

### **Technical Specifications**

#### **Product Parameters**

| Project               | Technical indicators      |
|-----------------------|---------------------------|
| Product name          | Vibration Damper          |
| Length                | 1300mm                    |
| Material quality      | PVC Line 11.5mm           |
| Overall weight        | 280g                      |
| Operating temperature | -20℃~60℃                  |
| Using diameter        | 8.3~11.7mm                |
| Clamping length       | 250-300mm                 |
| Application           | Overhead Line Accessories |
