

MPO ODF

Product Drawing

Product Description

MPO ODF is used for fiber backbone connection and cabling management in data center MDA, IDA, or HDA distribution areas. It is installed in 19 inch racks and cabinets and can be equipped with pre connected MPO adapter modules or MPO adapter front panels. The product combines the advantages of MPO connectors and provides efficient and stable fiber optic connection solutions through modular design.

Product features

- Adopting a high-density design, it can support multi-core fiber optic connections, improving the capacity and density of the fiber optic network.
- Adopting modular design, it facilitates users to flexibly configure and expand according to their actual needs.
- Adopting a completely enclosed structure, effectively preventing dust and rodents, ensuring the safe operation of fiber optic equipment.
- The MPO connector reduces insertion loss and improves the transmission quality of optical signals.

Application

Data center.

Communication room.

Enterprise network, etc.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	MPO ODF
Type	19inch Fixed Type
Core	Single or Multi Core
Port Qty	12/24
Material	Cold-rolled steel
Adapter	MPO
Color	Black
