Outdoor Water-proof Fiber Cabinet

Product Drawing

Product Description

Outdoor Water proof Fiber Cabinet is a waterproof fiber cabinet designed specifically for outdoor environments. Using high-strength materials and precise waterproof technology, ensuring stable protection and operation of fiber optic network equipment in various harsh outdoor environments. Whether it's urban streets, industrial parks, or remote mountainous areas, it can provide you with reliable solutions.

Product features

- Advanced waterproof technology and sealing materials are used to ensure that the equipment can still work normally under extreme weather conditions such as rainstorm and flood.
- Made of high-strength metal or composite materials, capable of withstanding natural factors such as wind, sun, rain, etc.
- Equipped with an efficient heat dissipation system, it ensures that the device maintains a stable temperature during long-term operation and extends its service life.
- Multiple specifications and configurations are available, and cabinets of different sizes can be selected according to actual needs to meet the storage needs of fiber optic network equipment in different scenarios.
- Adopting modular design for easy and quick installation and disassembly.

Application

Communication base station.

Fiber optic network nodes.

Smart City Project.

Industrial automation control.

Remote monitoring and data transmission.

Technical Specifications

Product Parameters

Project	Technical indicators
Product name	Outdoor Water-proof Fiber Cabinet
Specification	19' Standard Server Cabinet
Material	Double layer cold-rolled steel plate
Installation type	Floor-Standing
Capacity	6U-47U or customized
Color	Grey
Rating	IP65
Cabinet capacity	Outline dimension(H*W*D)
6U	600x450x350mm
9U	600x450x480mm
12U	600x450x600mm
15U	600x450x800mm
12U	600x600x600mm
15U	600x600x800mm
18U	1000x600x600mm
22U	1200x600x600mm
