- Digital control meter makes data input much easier and control time and temperature precision.
- Built-in counter to record production capacity.
- Adopt brand electronic components: F.R.L, relay, switch, air cylinder etc.
- Air pressure can be adjusted according to material thickness.
- 100x125mm powerful cylinder to generate even and stable pressure.
- 2 stainless rod Dia.50mm and 30mm to make machine running very stable and smooth.
- U shaped Heating elements was casted in aluminum to provide even temperature.
- Equipped with two infrared ray to help position article (optional).

# OPERATION PROCESS

Import the processed pictures into the computer

02  
Printing

03  
Sprinkle the powder and shake the powder into the drying tunnel to melt it

04  
Use Heat press machine pressing

05  
Wait 60s peel film

06  
cut flocking or bronzing materials to suitable size

07  
heating press again and cold peel it

08  
Finished product display
