Introduction

The TB60 is a new generation of multimedia player created by NovaStar for full-color LED displays. This multimedia player integrates playback and sending capabilities, allowing users to publish content and control LED displays with a computer, mobile phone, or tablet. Working with our superior cloud-based publishing and monitoring platforms, the TB60 enables users to manage LED displays from an Internet-connected device anywhere, anytime.

Support for multi-screen synchronous playback and synchronous and asynchronous modes makes this multimedia player a perfect fit for a wide range of applications.

Thanks to its reliability, ease of use, and intelligent control, the TB60 becomes a winning choice for commercial LED displays and smart city applications such as fixed displays, lamp-post displays, chain store displays, advertisement players, retail store displays, door head displays, shelf displays, and much more.

Features

Output

- Loading capacity up to 2,300,000 pixels
 - Maximum width: 4096 pixels, maximum height: 4096 pixels
 - Non-standard resolutions can be customized in both asynchronous and synchronous modes and the pixel clock of the custom resolutions cannot exceed 153 MHz.

- 4x Gigabit Ethernet ports

All these four ports serve as primary by default. Users can also set two as primary and the other two as backup.

- 1x Stereo audio connector

The audio sample rate is fixed at 48 kHz. If NovaStar's multifunction card is used for audio output, audio with a sample rate of 48 kHz is required.

- 1x HDMI 1.3 connector

Maximum output: 1920×1200@60Hz and support for HDMI loop

Input

- 1x HDMI 1.3 connector

In synchronous mode, this connector is used as the video source which can be scaled to fit the entire screen automatically.

- 2x sensor connectors

Connect to the brightness sensor or temperature and humidity sensor.

Control

- 1x USB 3.0 (Type A) port

Allows for USB playback, firmware upgrade and storage expansion.

- 1x USB (Type B) port

Connects to the control computer for content publishing and screen control.

- 1x Gigabit Ethernet port

Connects to the control computer, a LAN or public network for content publishing and screen control.

Performance

- Powerful processing capacity
 - Quad-core ARM A55 processor @1.8 GHz
 - Support for H.264/H.265 4K@60Hz video decoding
 - 1 GB of onboard RAM
 - 32 GB of internal storage

- Flawless playback

Support for playback of 1x 4K, 2x 1080p, 4x 720p, 4x 480p, or 6x 360p videos

Functionality

- All-round control plans
 - Enables users to publish content and control screens from a computer, mobile phone, or tablet.
 - Allows users to publish content and control screens from anywhere, anytime.
 - Allows users to monitor screens from anywhere, anytime.
- Wi-Fi AP and Wi-Fi Sta can be turned on at the same time
 - W-Fi AP

User terminal devices can connect to the built-in Wi-Fi hotspot of the multimedia player. The default SSID is “AP+ *Last 8 digits of SN*” and the default password is printed on the SSID label.
 - Wi-Fi AP+Wi-Fi Sta

Users can connect the multimedia player to a Wi-Fi network and turn on the Wi-Fi hotspot at the same time.
- Synchronous and asynchronous modes
 - In asynchronous mode, the internal video source works.
 - In synchronous mode, the HDMI video source works.
- Synchronous playback across multiple screens

Enabling synchronous playback halves the number of videos that can be played simultaneously within the decoding capability of the device.

 - NTP time synchronization
 - GPS time synchronization (The specified 4G module must be installed.)
 - RF time synchronization (The specified RF module must be installed.)
- Support for 4G/5G modules

The device ships without a 4G/5G module. Users have to purchase 4G/5G modules separately if needed.

Network connection priority: Wired network > Wi-Fi network > 4G/5G network (This order of priority is followed when the firmware is earlier than V4.5.0. The networks coexist when the firmware is V4.5.0 or later.)
