

1. Product Overview & Applications

BOPP Heat Sealable Film is a high-performance biaxially oriented polypropylene film designed for flexible packaging applications requiring excellent heat-sealing properties. With superior optical clarity, mechanical strength, and moisture resistance, this film ensures product freshness and extends shelf life. It is widely used in food, pharmaceuticals, and personal care packaging.

- Food Packaging: Suitable for snacks, confectionery, and processed food pouches.
- Pharmaceutical Packaging: Ensures protection for tablets, capsules, and medical supplies.
- Personal Care Products: Ideal for sachets and pouches for hygiene and beauty products.
- Industrial & E-commerce Packaging: Used for protective wrapping and tamper-evident seals.

- High stiffness.
- Quick heat sealing property.

4. Storage & Handling

- Store in a cool, dry environment with temperatures between 10° C and 30° C
humidity below 60% to prevent film deterioration.
 - Prolonged exposure to heat and UV light can alter the
sealing and mechanical strength.
 - Store rolls horizontally and avoid excessive pressure or
deformation and damage.
- Keep the film in a clean, dust-free environment to maintain its clarity and
efficiency.
