

## Overview

Tracer Dream F Series controller is based on Multi phase synchronous rectification technology and advanced MPPT control algorithm, adopt co-negative design, with LCD displaying running status. The MPPT control algorithm can minimize the maximum power point loss rate and loss time, quickly track the maximum power point of the PV array and obtain the maximum energy from solar modules under any conditions; and can increase the ratio of energy utilization in the solar system by 20%-30% compared with a PWM charging method.

## Features

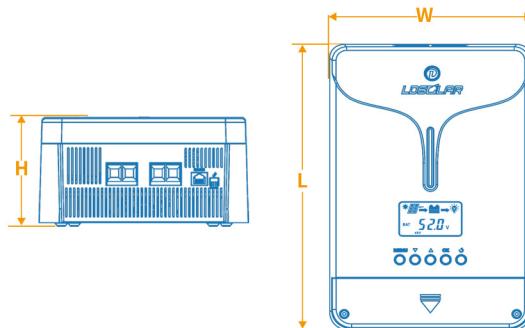

- ▶ Advanced MPPT technology, with efficiency no less than 99.5%
- ▶ Three phases synchronous rectification technology
- ▶ Maximum DC/DC conversion efficiency of 98%
- ▶ Common Negative Design
- ▶ Support the lead-acid,gel,flooded with the needed Temp
- ▶ Support lithium batteries start from solar panel
- ▶ Support parameters setting via the iConnect App
- ▶ Fan cooling solar controller are cooled by using fans
- ▶ Optional external WIFI or Bluetooth
- ▶ LCD display with back light
- ▶ RJ45 port

## Mechanical size

| Model                   | 60A         | 80A    | 100A        | 120A   |
|-------------------------|-------------|--------|-------------|--------|
| Charge and load current | 60A         | 80A    | 100A        | 100A   |
| Rated discharge current | 30A         |        | /           |        |
| Size (L×W×H) mm         | 260×200×105 |        | 316×210×110 |        |
| Mounting hole size      |             |        | Φ5mm        |        |
| Weight(kg)              | 2.4 kg      | 3.8 kg | 3.9 kg      | 4.0 kg |

● Please refer to the indicator diagram on the right

● Dimension reference drawing

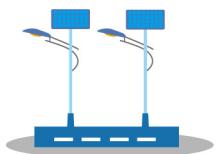

## Application scenario

Solar RV

Household solar energy

Solar street lamp

Solar Power Generator

Solar boat

## Safety Protection

## Technical specifications

①When a lithium battery is used, the system voltage can't be identified automatically. ②At minimum operating environment temperature

③At 25°C environment temperature ④When a lithium battery is used, the temperature compensate coefficient will be 0.

◆The controller can work under full load in the working environment temperature. When the internal temperature is more than 80°C, the reducing power charging mode is turned on.
