COMPANY VISION

COMPANY PROFILE ➤

Anxin Group has Henan Anxin Amusement Equipment Co., Ltd., Zhengzhou Anxin Amusement Equipment Co., Ltd., Henan Anxin Tourism Development Co., Ltd., Henan Happiness Tourism Development Co., Ltd., Henan Kaijing Culture Communication Co., Ltd., Henan Lujing Education Technology Co., Ltd. and many other companies and industrial Factories.

As the governing unit of Henan Recreation Association, we are a collection of e-commerce operation, overseas trade, tourist attraction development, construction and operation of supporting facilities. A comprehensive group company integrating management and amusement equipment manufacturing with multi-sector operations.

We have set up two marketing centers, Zhengzhou Yuhong International and Xinxiang Wujia, as well as three production bases, Huangdi Factory, Jiangying Factory and Xi'an Jimmy Factory. We have passed the certification of "ISO9001 Quality Management System, GB/T24001 Environmental Management System, GB/T45001 Occupational Health and Safety Management System". With large-scale amusement equipment manufacturing qualification, special equipment manufacturing A-level qualification, obtained more than 20 kinds of special equipment production license, such as Ferris wheel, family roller coaster, pirate ship, rapids, climbing railroad, zip line and so on. We have obtained 16 utility model patents and 59 appearance patents. And participated in the development of "Inflatable amusement facilities safety norms" national industry standards (GB 37219-2023), is China's amusement equipment industry leader; has served as the executive director of the China Association of Amusement Rides and Amusement Parks, President of the Association of Amusement Equipment Industry in the County of Ruijia unit.

Over the years we have participated in and witnessed the birth and growth of many amusement projects, for the park lack of IP, culture lack of carrier, visitors lack of experience of the park pain points.

With high standard production specifications and professional technical team, to children's point of view, to create a theme scene + theme amusement, effectively solve the problem of homogenization of the park. Product market share, widely recognized by the market.

Representative cases are Xinyu climbing railcar project, Ganzhou glass water slide project, Hubei Enshi glass water slide + powerless Park, Kashgar City, Xinjiang Autonomous Region, Hip Island Amusement Park 88-meter observation car, Xi'an City, White Deer Cottage Pirate Ship, wildly call, the rapids, Shandong Air Bike, high-altitude magic net, has landed in Shandong Laiwu, Inner Mongolia, Dalian, Liaoning, Jieyang, Guangdong, Hebei, Hebei Xingtai, Hebei, Chengde, Fujian Zhangzhou Carnival Duck Theme Park, Hebei Shuke Yue Mission Fun Fort, Jiangxi Ruichang Sahuan Park and more than 1,000 cases.

On behalf of the self-owned scenic spots are: Yunnan Qujing Nizhu River Grand Canyon Scenic Area, Chongqing Dadukou cloud on the field scenic area, Sichuan Dazhou Duxian Splash Park, Sichuan Zigong Rose Sea Splash Park, Chongqing Cherry Peony World Splash Park.

So far, our business scope covers many domestic provinces, municipalities and autonomous regions, and realize the export of products to Australia, the United States, Canada, Southeast Asia and other more than 80 countries and regions, in more than 30 countries to obtain a stable market results, drawing a picture of the enterprise to take root, the reputation of the global development blueprint.

In the future, the company will adhere to the development concept of "integrity, pragmatic, efficient, innovative, focused", adhere to the mission of "spreading civilization, creating joy", and with the spirit of "hard work, never give up! With the spirit of "hard work, never give up", we will strive to realize the goal of "cultural tourism industry leader" and the cause of the great rejuvenation of the Chinese nation.

02 PRODUCT DISPLAY

■ Booster Scream Rides

Booster Scream Rides is a large 360° rotating amusement equipment, shaped like a colorful hammer rotating in the air. Booster Scream Rides in 360 ° and falls weightlessly while the cockpit rotates freely by centrifugal force. Crazy Call provides a more exciting and scary experience than general amusement facilities, to satisfy the visitors' pursuit of extreme excitement. Through the 360 ° rotation and weightless fall and other actions, it brings strong visual impact and physical sensation.

■ Free Fall Drop Tower

Free Fall Drop Tower is a kind of amusement equipment which integrates vertical movement and rotating movement, with the theme of rotating and lifting. Its structure is magnificent, the decoration is simple and elegant, the appearance is bright and colorful, and it runs freely. Free Fall Drop Tower brings visitors a strong sense of vertigo and visual impact, providing a new amusement experience. At the same time, it is suitable for both young and old, integrating entertainment, thrill and excitement, and has become a landmark amusement facility.

■ Jumping Machine

Jumping Machine is a high-altitude thrill ride, the design concept originated from the exciting feeling of jumping from a building at high altitude. Visitors sit on special seats and fall suddenly as the machine rises to a high altitude, bringing a strong sense of weightlessness. jumping machine provides an instant thrill and heart-racing sensation that keeps visitors coming back for more. At the same time, jumping machine is also characterized by safety, efficiency and portability, and can be used as emergency escape equipment in unexpected events.

■ Top Spin Ride

Top Spin Ride is a kind of mechanical amusement equipment integrating technology, art and excitement, which utilizes advanced mechanical engineering technology to bring tourists to a high altitude, experiencing the thrilling excitement of overturning rivers and turning the sky and the earth. The design of this equipment is inspired by the ancient legend of "Chang'e Runs to the Moon", and combines modern technology and art to provide visitors with a time-traveling visual and spiritual feast.

■ Flying High In The Sky

Flying High In The Sky equipment provides visitors with the exciting experience of flying at high altitude through rotating and lifting movements. Visitors sitting on the chairlift, with the equipment rotating and lifting, can feel a strong sense of excitement and pleasure. The equipment is designed with the safety and experience of the visitors in mind. The bracket and seat are made of high-strength materials with anti-vibration treatment. The maximum rotation speed and tilt angle of the equipment are strictly controlled to ensure that visitors enjoy the excitement while safeguarding their safety. During the high altitude flight, visitors can have a spectacular 360-degree view of the entire park and its surroundings. This kind of wide-open view and beautiful scenery at high altitude brings visitors a unique visual enjoyment.

■ Cliff Swing

Cliff swings are an extremely popular extreme sports activity that takes the traditional game of fall drying to a new level of thrill. This type of ride is usually located on the edge of a cliff and offers visitors a unique and exciting experience. The structure of a Cliff Fall Dry generally consists of a gate-type bracket supported by six steel tubes and securely fastened within the cliff to ensure safety. The seat is designed to carry passengers and swing freely under the force of gravity. Some Cliff Falls are designed to allow the fall to swing outward from the edge of the cliff giving passengers an exhilarating sense of levitation and weightlessness. Cliffhangers have strict safety regulations. For example, some cliff rides are only available to visitors between the ages of 18 and 48 who weigh no more than 170 pounds. Visitors are required to have their blood pressure and pulse taken before the ride to ensure they do not have cardiovascular disease. In addition, passengers must wear safety equipment before riding, such as waiya costumes and helmets, as well as safety ropes, safety hooks and seat belts connected to the fall trunks, forming a four-fold safety protection system. Cliff class equipment in the domestic application of the current mature cases, and the effect is very popular with tourists.

▪ Ferris Wheel

A Ferris wheel is a large rotary-shaped mechanical device with a Gondola (passenger cabin) hanging from the edge of the wheel. Passengers sit on the Ferris wheel slowly turn up, can overlook the surrounding scenery from the height.

The most common occasions for Ferris wheels are amusement parks (or theme parks) and park Tours, as a playground motor game, and roller coasters, carousels together called the "three treasures of the park", but Ferris wheels also often exist alone in other occasions, usually as a viewing event.

■ Pirate Ship

Pirate ship is the 1 kind of newly designed sightseeing car amusement machine. It is the 1 kind of amusement project that swings back and forth around the horizontal axis. This kind of amusement machine has different names due to the same modeling diagram. "Pirate ship" is named after its appearance antique pirate ship. The shape of the pirate ship is American Indian tribal style. After starting, the pirate ship swings slowly and rapidly. Passengers ride on the pirate ship and swing back and forth from slow to rapid, just like visiting the stormy sea. From time to time, they rush to the peak of the waves, sometimes fall to the bottom of the valley, thrilling and exciting, challenging the limit of your psychological endurance.

■ Water Coaster

Water Coaster is a type of motorized water ride commonly found in themed amusement parks. This type of ride allows visitors to ride in specially designed boats that float through constructed waterways. Visitors can enjoy a variety of themed landscapes and experience an exciting water journey during their visit.

■ Carousel

Revolving horse game machine, novel shape, colorful color, is a young friends love to ride the game machine. After the turntable starts, the turntable rotates at a constant speed, and the different shapes of the turntable rise and fall, so that the players have the feeling of raising the whip and galloping the field.

This product is suitable for parks, amusement parks, children's palaces, life squares, communities and other densely populated mobile places.

The product is made of glass steel material, with environmental protection, safety, corrosion resistance, good stability and other characteristics, can be customized according to the site conditions.

■ Swivel Flying Chair

1. strong attraction: the rotating flying chair is usually located in the conspicuous position of the playground, and its unique movement mode and appearance design can attract the attention of tourists and increase the interest of tourists.
2. Good experience: During the operation of the rotating flying chair, visitors can experience the feeling of flying, especially when rotating at high altitude, it can bring excitement and fun, suitable for tourists of all ages.
3. Decorative: The rotating flying chair is usually designed with exquisite lighting and decoration, and can become a beautiful landscape of the playground when running at night.
4. Social interaction: The rotating flying chair can usually be used by multiple people at the same time, which promotes the interaction and communication between tourists and increases the fun of playing.
5. High flexibility: The rotating flying chair can adjust the rotation speed and height according to the needs to adapt to the needs of different tourists.

■ Pendulum Rides

The big pendulum is one of the latest and most dazzling large-scale amusement equipment in the world. The big pendulum is also known as "knight of war". The equipment can ride 22 warriors. While it swings like a clock, it also rotates at a high speed of 25 kilometers per hour, sending the warriors high into the air. You can experience the strong feeling of thunder loss and centrifugal force, and fully experience the thrilling ups and downs of medieval century: knight knight in jihad.

■ Roller Coaster I

Roller Coaster I is relying on the car body in the role of inertial force along the maze track rushed down, scared as a lost flying squirrel in the jungle, hurried as anxious to find a way out of the flying squirrels, jumping up and down, circling and flying. Ride on it, but also make passengers fully appreciate the speed of rapid change brought about by the heartbeat and excitement.

Roller Coaster I is similar to a scaled-down version of a roller coaster in that it is able to complete multiple maneuvers such as sliding, turning, rising, and swooping, providing a strong sense of excitement. At the same time, in order to ensure safety, this equipment reduces the side flip effect, making it more suitable for building in parks, scenic spots and other places. The design and manufacture of the equipment pays great attention to safety and is made of high-strength materials and undergoes rigorous engineering tests to ensure that visitors can enjoy the thrill as well as full protection.

Roller Coaster I ride also has a high entertainment value and is suitable for people of all ages. Visitors can experience the feeling of flying in the air, feeling the wind whistling, the branches of the trees and the sunshine flashing, as if they were in nature.

■ Space Walk

1. Novelty experience: The spacewalk equipment provides 1 unique experiences that simulate spacewalks, which is very attractive to tourists who pursue freshness and excitement.
2. Wide range of adaptation: The spacewalk equipment is suitable for tourists of different ages, whether children, teenagers or adults can enjoy this experience.
3. Does not occupy ground space: Since the equipment is usually suspended in the air, it will not occupy ground space, which is conducive to the site planning of amusement parks or entertainment venues.
4. Good economic benefits: Due to the uniqueness of the spacewalk experience, it can attract a large number of tourists, thereby bringing good economic benefits.

■ Roller Coaster II

Roller Coaster II type in the process of gliding, passengers will experience different rotating movements, such as weaving in the forest, soaring in the air feeling. This exciting, thrilling experience, accompanied by changes in speed, brings unlimited fun to passengers.

Roller Coaster II usually glides along the established track inertially. Its seat part in the whole along the track gliding can produce different rotating movement, so that the slide car in the process of gliding action more rich, to provide passengers with an unusual and full of fun ride experience.

■ Automatic Control Aircraft

1. Strong interaction: passengers can personally control the plane and experience the fun of flying. This sense of participation is a highlight of the self-controlled aircraft, which can attract tourists to play repeatedly.

2. Adaptable: Self-controlled aircraft are suitable for passengers of different ages, especially children and teenagers, and can also attract some adults.

3.Low maintenance cost: The structure of the automatic control aircraft is relatively simple, and the maintenance is more convenient, which reduces the operating cost.

4. Strong customizability: The automatic control aircraft can be customized according to customer needs, including appearance design, size, function, etc., to adapt to different market positioning and theme styles.

■ Bumper Car

1. Strong interaction: bumper cars allow direct interaction between tourists, through chasing and collision to increase the fun of the game, suitable for family and friends to play together.
2. Strong adaptability: Bumper cars are suitable for tourists of different ages, and both children and adults can enjoy the fun.
3. Strong durability: Bumper cars are usually made of sturdy materials, can withstand frequent use and collisions, and have a long service life.
4. Diversity: Bumper cars have a variety of styles and themes, which can be selected and customized according to the overall style of the playground to increase attractiveness.
5. Strong entertainment: bumper cars provide 1 simple and pure entertainment, which can bring tourists a tense and exciting game experience and release pressure.
6. Good economic benefits: The investment cost of bumper cars is relatively low, and the operating cost is not high, but it can attract a large number of tourists and bring good economic benefits to the amusement park.

■ Sightseeing Train

1. As a characteristic means of transportation in scenic spots, sightseeing trains are not only responsible for passenger transport, but also 1 an important tourist attraction.

2. Scenic spot sightseeing train can integrate multiple scenic spots, especially for large-scale scenic spots, scenic spot train is an effective tool to improve the traffic accessibility of various scenic spots.

3. the tourist landscape design along the sightseeing train should be rich and varied, changing the scenery step by step to give tourists a visual feast.

4. the scenic sightseeing station should be set up along the small train. besides the necessary tourist facilities, the scenic sightseeing station should also be equipped with rich and colorful tourist activities and projects.

■ Rave Duck Park

In a faraway place, there is a group of lively and lovely little yellow ducks, they all have a common name - “Rave Duck” . They are not ordinary ducks, but magic messengers who bring unlimited joy to children. In a bright morning, the ducks are lined up neatly, ready to lead the children to start a day of adventure. Each “Rave Duck” has its own story, and they use warm plots and interesting interactions to immerse children in a dreamy scene.

04 GROUP VISION

Anxin Group will further enhance its core competitiveness and is committed to creating a new amusement experience that is green, intelligent and safe.

We are committed to paying more attention to environmental protection and social responsibility while pursuing economic benefits, ensuring that our projects are in harmony with nature and providing tourists with both exciting and environmentally friendly play environments. At the same time, we will deepen our cooperation with our global partners to explore new modes of cultural tourism industry and promote the improvement of industry standards. On the road of development in the future, we will not forget the original intention, forge ahead, with our innovation and persistence, to write a more colorful new chapter of cultural tourism, so that our

amusement rides become a bridge connecting culture and joy, bringing endless laughter and wonderful memories to tourists around the world.

Looking into the future, Anxin Group is committed to becoming a global leader in large-scale engineering amusement equipment for scenic spots. We will follow the pace of the times, innovate constantly, and add infinite charm to the global tourist attractions with high-quality products and services. We firmly believe that through the joint efforts of all staff, the company will achieve more brilliant results in technological innovation, market expansion, brand building, etc., and contribute our wisdom and strength to promote the development of cultural tourism industry and enhance the experience of tourists. In the future journey, let us join hands to create a better future!
