

Parameters

Model	SH-T15 Intelligent Health Checkup Kiosk
Control System	15 inches HD touch screen
Identification	Face recognition, mobile phone/membership number; QR code/barcode/IC card (optional)
Height	High-precision height sensor height range: 50-205CM, height accuracy ± 0.5 CM
Weight	Industrial-grade large-capacity load cell weighing range: 5-500KG, weight accuracy ± 0.1 KG
Fat	Range: 5.0%-75%, division value: 0.1%; can analyze muscle, bone mass, basal metabolism, etc.
Blood Pressure	Electronic sphygmomanometer, range: 0-299mmHg(0-39.9kpa)/pulse: 40-180 beats/min
Blood Oxygen	Finger clip oximeter, range: 35%-100%;
Temperature	Infrared forehead temperature gun, optional wireless temperature measurement
Blood Glucose	20-600mg/dl (1.1-33.3mmol/L); 20% when blood glucose concentration > 75mg/dl (4.17mmol/L)
Uric acid	Range: 3-20mg/dl (0.18-1.19mmol/L) (optional)
Cholesterol	Range: 100-400mg/dl (2059-10.35mmol/L) (optional)
WHR	waist circumference and hip measurement
Vision	Vision, astigmatism, color weakness and color blindness, etc.
Mental Health	Stress, anxiety, depression, etc.
TCM	Automatic recognition of the nine constitutions of TCM
Printer	thermal printer; Optional A4 printer
Data Output	RS232 serial port, optional: Bluetooth, 4G, WiFi, cloud transmission, etc.
Docking System	APP, public health system, HIS/LIS system, member management system, health software, etc.
Brand Promotion	Can customize screen pictures, videos, audios, text slogans, etc.
Health Report:	Printing receipt, A4 color/black and white report (optional)
Dimensions	L*W*H: 965*709*2316mm; Gross Weight: 55KG;

Optional Functions

Alcohol test

Four blood lipids

Urinalysis

Hemoglobin

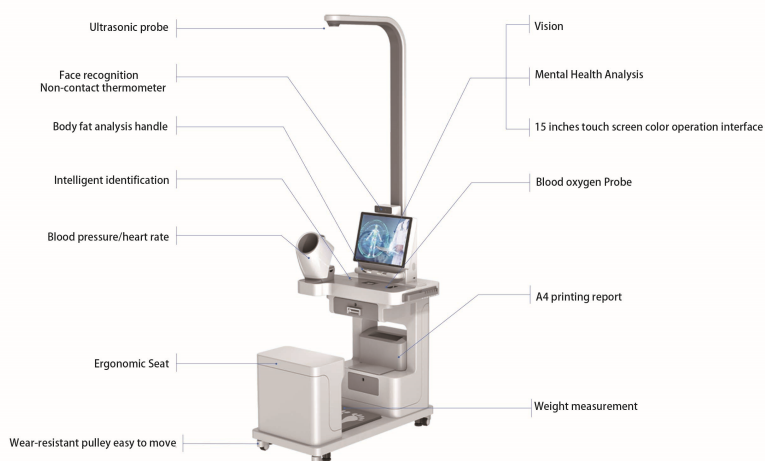

A4 printing

SH-T15 Intelligent Health Checkup Kiosk

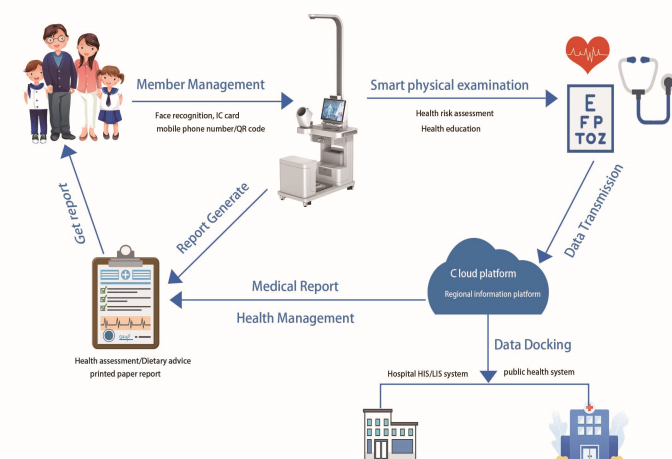

SH-T15 Health Kiosk

Functions

Health Solution

Application

Advantages

Member Management

Support face recognition IC card and other methods to quickly establish health records.

Self-check Examination

The whole process of voice broadcast, animation graphic guide operation, simple and easy to operate, meet the needs of self-service physical examination.

Intelligent Interconnection

It can be connected to various HIS/LIS, public health, and health management systems, and supports multiple data transmission methods such as WiFi and Bluetooth. The data transmission is stable and fast.

Large Storage Space

The upper and lower drawers have a larger storage space; and the upper drawer adopts a grid storage design, so that the items are placed more neatly and are not easy to lose.
